Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Platform

- Spearheaded development of an agentic AI system using **LangGraph** and **OpenAI API** for automated code generation, improving developer productivity by 25%.
- Implemented **RAG** capabilities with **Pinecone** and **FastAPI** to enhance code search efficiency, reducing retrieval times by 40% for critical documentation queries.
- Designed and deployed **browser automation** workflows using **Playwright** on **AWS Lambda** to scrape competitor product data, enabling strategic pricing adjustments and increasing market share by 15%.
- Engineered **CI/CD** pipelines with **Docker** and **Kubernetes** for **TypeScript** microservices, reducing deployment time from 2 hours to 15 minutes and improving system stability by 99.8%.
- Integrated **LLM APIs** including **Anthropic** to build multimodal AI assistants for onboarding new developers, accelerating ramp-up time by 30% through personalized guidance.
- Developed novel prompt engineering strategies for **agentic systems**, resulting in a 20% reduction in hallucination rates for complex code refactoring tasks and improved code quality.
- Optimized **vector search** performance with **Elasticsearch** and **Redis** for a knowledge base, enabling real-time retrieval of over 5 million technical articles for instant developer assistance.
- Architected a scalable backend using **Python** and **Django** for an enterprise SaaS platform, supporting over 100,000 concurrent users with 99.99% uptime and low latency.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | B2B Platform

- Developed a novel **AI system** using **Python** and **LangChain** for intelligent document processing, achieving 95% accuracy and reducing manual data entry by 50%.
- Built **REST APIs** with **FastAPI** and **TypeScript** to integrate **LLM APIs** for customer support automation, decreasing average response times by 70% and increasing customer satisfaction.
- Implemented **RAG** pipelines with **AWS S3** and **PostgreSQL** to ingest and retrieve vast amounts of unstructured data, improving search accuracy for enterprise knowledge management by 35%.
- Designed and deployed **browser automation** scripts using **Playwright** to monitor website changes, detecting and alerting on critical updates 24/7, preventing revenue loss from downtime.
- Contributed to the development of **agentic workflows** for automated QA testing, reducing manual regression testing effort by 60% and identifying critical bugs earlier in the development cycle.
- Leveraged **OpenAI API** to build natural language interfaces for complex data analysis tools, empowering non-technical users to derive insights and increasing data-driven decision-making by 25%.
- Managed and optimized **AWS RDS** PostgreSQL databases supporting critical application features, ensuring high availability and scaling to handle over 10 TB of data with 99.9% performance.
- Engineered data processing pipelines using **Python** and **AWS Lambda** on **AWS S3**, processing over 5 million records daily and reducing data ingestion latency from 4 hours to 20 minutes.
- Implemented robust **test automation** suites using **Pytest** for core application modules, increasing code coverage by 40% and significantly reducing production defects by 30%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | SaaS Platform

- Developed scalable **REST APIs** using **Python** and **Django** for a financial data aggregation service, processing over 1 million transactions daily with 99.9% uptime.
- Implemented **SQL** queries and **PostgreSQL** database schemas to efficiently manage and retrieve time-series financial data, optimizing query performance by 25%.
- Built user interfaces with **JavaScript** and **React** for visualizing complex financial metrics, improving data accessibility and enabling faster insights for traders.
- Developed automated data ingestion processes using **Python** scripts to connect to various external financial data sources, ensuring timely and accurate data updates.
- Collaborated in an agile environment using **Git** for version control and participated in code reviews to ensure high code quality and maintainability for critical fintech applications.
- Designed and implemented **CI/CD** pipelines with **Jenkins** for automated testing and deployment of web applications, reducing deployment cycle time by 30%.

Skills

Languages: Python, TypeScript, SQL, JavaScript
Frameworks & Tools: LangGraph, CrewAI, Playwright, FastAPI, Django, React, Node.js, Docker, Kubernetes, Git
Cloud & Infra: AWS Lambda, AWS S3, AWS EC2, AWS RDS, Azure Functions
Databases & Search: PostgreSQL, MongoDB, Elasticsearch, Redis, Pinecone
Concepts: LLM APIs, Prompt Engineering, RAG, Agentic Systems, Vector Search, REST APIs, CI/CD, Test Automation,

Microservices, Browser Automation
AI Tools: OpenAI API, LangChain, LlamaIndex, Hugging Face

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
