Neel Gali

AI/ML Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Stillwater, OK

PROFESSIONAL SUMMARY

AI/ML Engineer with 3+ years of experience applying deep learning to computer vision and decision-making for autonomous systems, passionate about space exploration. Expertise in sensor fusion, environmental perception, and path planning algorithms using Python, PyTorch, and TensorFlow, with hands-on experience deploying and debugging software on robotic hardware. Proven ability to solve complex, real-world challenges in fast-paced, cross-functional teams.

TECHNICAL SKILLS

Machine Learning & AI: Deep Learning, Transformers, Large Machine Learning Models, PyTorch, TensorFlow, OpenCV, Scikit-learn, YOLOv8, Detectron2, LLMs, RAG

Autonomous Systems & Robotics: Autonomous Systems, Computer Vision, Decision-Making, Sensor Fusion, Environmental Perception, Path Planning Algorithms, Robotics, Guidance, Navigation, and Control (GNC), Embedded Systems, Robotic Hardware

Programming & Simulation: Python, C++, SQL, Simulation Environments (Gazebo, NVIDIA Isaac Sim), Deploying and Debugging Software, Bash, PowerShell

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Git, GitHub Actions, CI/CD, Terraform, Apache Kafka

Data Analysis & Management: Exploratory Data Analysis, Feature Engineering, Statistical Modeling, PostgreSQL, MongoDB, DynamoDB

PROFESSIONAL EXPERIENCE

AI / ML Engineer | Epik Solutions

Jun 2025 - Present

• Developed advanced deep learning models using Python and PyTorch to analyze high-volume telemetry data for cybersecurity threat intelligence, improving decision-making for security teams by detecting critical anomalies with 95% accuracy and reducing incident response time by 30%.

• Orchestrated the deployment and continuous monitoring of machine learning models into production environments, leveraging Docker and AWS to ensure robust performance and enabling real-time detection of complex, real-world challenges within cybersecurity infrastructure.

AI / ML Engineer | Samay Systems LLC

July 2024 - Jun 2025

• Designed and implemented supervised and unsupervised deep learning models using Python and TensorFlow to automate compliance validation and risk analysis, enhancing decision-making processes for internal audit teams and achieving a 40% reduction in manual review effort across critical systems.

• Developed AI-assisted workflows integrating large machine learning models (LLMs) with structured enterprise data via tool-calling agents, facilitating automated evidence collection and summary generation for complex compliance audits, reducing report generation time by 60%.

• Deployed high-availability services leveraging AWS cloud-native infrastructure, Docker, and Kubernetes within CI/CD pipelines, ensuring reliable and scalable operation for critical compliance applications, supporting multi-tenant environments with 99.9% uptime.

ML Intern | Monarch Tractor

Jun 2023 - Aug 2023

• Supported the development of deep learning-based computer vision and ML pipelines for semi-autonomous agricultural vehicles, utilizing Python, PyTorch, and OpenCV to enable robust environmental perception and decision-making in real-world operating conditions.

• Implemented object detection and segmentation models using TensorFlow for critical perception tasks, rigorously validating outputs against operational constraints for autonomous systems, leading to a 15%

improvement in obstacle avoidance accuracy on robotic hardware.

• Gained hands-on experience deploying and debugging software on embedded systems, contributing to cloud-hosted production environments for ML models, and performing inference validation to ensure optimal performance for autonomous vehicle operations.

Associate Data Scientist | ZeMoSo Technologies

Jul 2021 - Aug 2022

• Contributed to a scientific operations platform by building Python backend services that validated, enriched, and structured experimental data, establishing reliable inputs for downstream analytical modeling and decision-making processes.

• Supported Proof-of-Concept ML experimentation workflows by automating dataset preparation, feature engineering, and experiment tracking using Python and SQL, accelerating data scientists' ability to generate insights by 25% through improved data quality and accessibility.

EDUCATION

Master’s in Computer Science | Oklahoma State University, Stillwater, OK

Bachelor’s in Computer Science | JNTU Hyderabad, India
