Professional Experience

Full Stack Engineer (AI) *Jun 2025 - Present*

Epik Solutions

- Engineered high-performance microservices in Go and Python to ingest telemetry from 15+ systems into a centralized Snowflake warehouse, automating 40% of SOC workflows and reducing MTTR by 15 mins
- Built real-time React-based analytics dashboards aggregating telemetry from 15+ systems, eliminating 20+ hours/week of manual reporting and improving decision latency for C-suite stakeholders
- Developed AI-driven incident triage pipelines (Airflow, Azure OpenAI) processing 1,000+ daily events, reduced analyst workload by 30% and enforced data governance via Terraform-managed access policies.
- Automated cross-functional enterprise workflows with ETL pipelines using PySpark to process and ingest enterprise data into Databricks Delta Lake, serving 500+ users, reducing operational cycle times by 40%
- Deployed services using Azure cloud-native infrastructure, Docker, Kubernetes, Github Actions and resolved silent execution failures in distributed Go runbooks, improving pipeline success rates by 25%

Founding Engineer (Full Stack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected and built an AI compliance SaaS platform serving 15+ enterprise clients, scaling to 10,000+ users per org on AWS, engineered isolated multi-tenant architectures with Snowflake and PostrgeSQL
- Designed Golang-based distributed pipelines (AWS Glue, Kinesis, CDK, Lambda) and Airflow for multi-stage ETLs to automate SOC2/ISO 27001 evidence collection and real-time control validation
- Built LLM-powered compliance automation (AWS Bedrock, LangChain, MCP, n8n) to orchestrate evidence collection, summarization, and control scoring, reducing manual auditor effort by 70%
- Developed distributed ETL pipelines ingesting 5M+ daily events into knowledge graphs, utilized SQL (PostgreSQL) and graph databases to prepare and normalize complex datasets for real-time analytics
- Developed fullstack React + GraphQL applications enabling compliance controls, evidence management, policy authoring, identity graph visualization and document storage for enterprise users

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built an automated identity lifecycle system syncing 500+ employees across UKG, JumpCloud, and Azure AD using (AWS/Azure) Serverless architecture, reducing provisioning time by 80%
- Developed full-stack features (React, Golang) for MLOps data labeling infrastructure, improving annotation throughput by 20% for ML training pipelines

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab automation platform used by 500+ scientists, working across React, Ruby on Rails, spring boot and PostgreSQL in a microservices architecture
- Designed and implemented features across 10+ core product modules (inventory, compounds, batch tracking, LCMS uploads, container linkage), enabling accurate tracking of complex experimental data
- Authored 100+ test cases and resolved critical production issues, integrated CI/CD pipelines using Jenkins to enforce quality checks, and promote artifacts in a regulated scientific platform

Skills

Languages: Python, Golang, Ruby, Java, TypeScript, JavaScript, SQL, Bash, C++
AI & ML: LLMs (Azure OpenAI, AWS Bedrock), RAG, LangChain, MCP, TensorFlow, OpenCV
Frameworks: React, Node.js, GraphQL, Spring Boot, Ruby on Rails, Gin
Cloud & DevOps: AWS (Glue, Kinesis, EMR), Azure, Docker, Kubernetes, Terraform, Github Actions
Databases: Snowflake, Databricks, PostgreSQL, MySQL, MongoDB, Redis, OpenSearch, Pinecone, Neo4j
Tools & Methodologies: Git, Apache Airflow, n8n, Power Platform, WSL2, Linux, Agile (Scrum/Kanban), Medallion Architecture, Data Observability, TDD, CI/CD, SRE

Education

Master's in Computer Science, Oklahoma State University, Stillwater *Aug 2022 - May 2024*
Bachelor's in Computer Science, JNTU Hyderabad, India *Jul 2017 - Jun 2021*
