Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Nagarro | Real-time Mobility Platform

- Designed and implemented scalable **Python** microservices for the core rider experience, integrating with external mapping **APIs**, reducing response latency by 15% for 10M daily requests.
- Led the development of a new real-time driver matching algorithm using **Go** and **Kafka**, enhancing match accuracy by 10% and decreasing wait times for 500K users.
- Optimized critical data pathways on **AWS RDS** and **Redis** for ride state management, improving system reliability by 20% and handling peak loads effectively.
- Implemented robust **CI/CD** pipelines using **GitLab CI** for multiple **Go** microservices, accelerating deployment frequency by 25% and ensuring code quality.
- Performed extensive system design and code reviews for new features, ensuring adherence to object-oriented programming principles and maintainability across 15+ services.
- Managed on-call rotations, triaging and resolving critical production issues across distributed **Python** and **Go** applications, achieving 99.9% uptime availability.
- Collaborated cross-functionally with product and data science teams to define requirements for user-facing features, improving user engagement by 8% through iterative development.

Software Engineer *Jul 2022 – Jun 2025*

Globant | Enterprise FinTech Data Platform

- Developed and maintained backend **Python** microservices for a FinTech data platform, processing 100GB of daily financial transactions on **AWS Lambda** and **S3**.
- Implemented high-performance **Java Spring Boot REST APIs** for data ingestion and retrieval, supporting over 20 concurrent enterprise clients with 99.9% uptime.
- Designed and optimized complex **SQL** queries for **PostgreSQL** databases, enhancing report generation speed by 30% for critical business intelligence dashboards.
- Integrated new data sources using **Apache Kafka** for real-time streaming, reducing data lag from hours to minutes for analytics teams, impacting 500K daily events.
- Wrote comprehensive unit and integration tests using **Pytest** and **JUnit** for critical system components, increasing code coverage by 20% and reducing bug density.
- Participated in code reviews, providing constructive feedback on architectural patterns and object-oriented programming best practices, improving team's overall code quality by 15%.
- Assisted in migrating monolithic applications to a microservices architecture on **AWS ECS**, reducing infrastructure costs by 10% and improving deployment flexibility.
- Responded to and resolved production incidents during on-call rotations, debugging complex issues across distributed systems, reducing average resolution time by 25%.

Software Engineer *Jul 2020 – Aug 2022*

Persistent Systems | B2B Integration Solutions

- Developed and maintained **Java Spring Boot** applications for B2B integration, creating robust **REST APIs** that handled 50,000 requests per hour efficiently.
- Designed and implemented database schemas using **MySQL**, optimizing queries to reduce report generation time by 25% for internal analytics tools.
- Contributed to **CI/CD** pipeline setup using **Jenkins** for automated builds and deployments, decreasing release cycle time by 15% across several projects.
- Applied object-oriented programming principles and data structures to optimize core business logic, improving application performance by 10% for concurrent users.
- Collaborated with senior engineers on system enhancements and bug fixes, reducing critical defect count by 20% through rigorous testing and code reviews.

Skills

Languages: Python, Go, Java, SQL
Frameworks & Tools: Spring Boot, RESTful APIs, Git, Docker, Kafka, Pytest, JUnit, GitLab CI, Jenkins
Cloud & Infra: AWS, Microservices, Distributed Systems
Databases & Search: PostgreSQL, MySQL, Redis
Concepts: Object-Oriented Programming, Data Structures, Algorithms, System Design, Scalability, Reliability, CI/CD, On-Call, Code Reviews, Agile, Observability

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
