Professional Experience

AI Automation Engineer *Jun 2025 - Present*

Epik Solutions

- Implemented scalable microservices using Go and Python, integrating enterprise security platforms and automating 40% of SOC workflows and reducing MTTR by 15 minutes for internal security teams
- Built real-time React-based analytics dashboards aggregating telemetry from 15+ systems, eliminating 20+ hours/week of manual reporting and improving decision latency for C-suite stakeholders
- Developed AI-driven incident triage pipelines (Python, n8n, Azure OpenAI) processing 1,000+ daily security events, reducing analyst workload by 30% while ensuring CI/CD governance using TF Sentinel
- Developed TypeScript-based headless automation scripts using Cypress to automate multi-step authentication flows and session-state capture, enabling automated security crawling of complex SPAs
- Deployed services using Azure cloud-native infrastructure, Docker, Kubernetes, Github Actions and resolved silent execution failures in distributed Go runbooks, improving pipeline success rates by 25%

Founding Engineer (Full Stack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected and built a multi-tenant AI compliance SaaS platform serving 15+ enterprise clients, scaling to 10,000+ users per org on AWS, ensuring scalability, tenant isolation, and high availability
- Designed distributed backend systems using Golang, AWS CDK, Lambda, ECS, AppSync, SQS, PostgreSQL, and Neo4j with strict tenant isolation across relational, graph, and object storage layers
- Built LLM-powered compliance automation (AWS Bedrock, LangChain, MCP, n8n) to orchestrate evidence collection, summarization, and control scoring, reducing manual auditor effort by 70%
- Developed distributed pipelines ingesting 5M+ daily identity events into knowledge graphs, built GraphRAG-based compliance chatbots, reducing unauthorized user access footprints by 30%
- Orchestrated Cypress automation suites within GitHub Actions to perform continuous 'smoke-tests' of tenant isolation boundaries, ensuring zero cross-talk between high-availability environments

IT Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built an automated identity lifecycle system syncing 500+ employees across UKG, JumpCloud, and Azure AD using (AWS/Azure) Serverless architecture, reducing provisioning time by 80%
- Engineered a TypeScript automation suite using Cypress to perform end-to-end validation of identity lifecycle transitions, resolving edge cases in cross-platform (UKG/Azure AD/JumpCloud) propagation.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab automation platform used by 500+ scientists, working across React, Ruby on Rails, spring boot and PostgreSQL in a microservices architecture
- Designed and implemented features across 10+ core product modules (inventory, compounds, batch tracking, LCMS uploads, container linkage), enabling accurate tracking of complex experimental data
- Engineered a custom TypeScript wrapper for Playwright/Cypress to perform automated 'proof-of-concept' validation, capturing DOM snapshots across complex scientific experimentation workflows

Skills

Languages: Python, C#, Java, Golang, Ruby, TypeScript, JavaScript, SQL, Bash, C++
AI & ML: LLMs (Azure OpenAI, AWS Bedrock), RAG, LangChain, MCP, TensorFlow, OpenCV
Frameworks: React, cypress, ASP .NET Core, .NET 8/6, Node.js, GraphQL, Spring Boot, Ruby on Rails, Gin
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Github Actions, Jenkins
Databases: PostgreSQL, MySQL, MongoDB, Redis, OpenSearch, Pinecone, Neo4j
Tools & Methodologies: Git, n8n, Power Platform, WSL2, Linux, Agile (Scrum/Kanban), TDD, CI/CD, SRE

Education

Master's in Computer Science, Oklahoma State University, Stillwater *Aug 2022 - May 2024*
Bachelor's in Computer Science, JNTU Hyderabad, India *Jul 2017 - Jun 2021*
