Neel Gali

Software Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Advanced Software Solutions

- Led **software design and development** of a high-performance feature for a **consumer product/application** using **Java** and **Spring Boot**, improving system response time by 15%.
- Mentored junior engineers on **software development life cycle** (**SDLC**) and **design standards**, enhancing team productivity and code quality by 10%.
- Optimized critical backend services with **Kotlin** and **Kafka**, processing over 100,000 transactions per second, reducing latency by 20% consistently.
- Implemented robust **CI/CD pipelines** using **Jenkins** and **Docker** for microservices, streamlining deployments and decreasing release cycles by 25%.
- Effectively **troubleshooted** complex production issues using **debuggers**, **emulators**, **simulators**, and **logic analyzers**, reducing critical **defect resolution** time by 30 minutes.
- Developed scalable APIs with **Python** and **FastAPI** on **AWS Lambda**, supporting new partner integrations and increasing data throughput by 40%.
- Contributed to architectural decisions for enterprise **software solutions**, ensuring adherence to security and performance standards, boosting system reliability by 15%.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Enterprise Application Development

- Developed and maintained core modules for an enterprise application using **Java** and **Spring MVC**, directly impacting 5,000+ internal users daily and improving workflow.
- Implemented new features and performed essential **maintenance activities** for a critical system using **C++**, improving overall operational efficiency by 18%.
- **Identified and resolved defects** in existing **software solutions** using **debugger** tools effectively, reducing bug count by 25% and enhancing stability.
- Participated in **software design and development** of a new inventory system with **C#** and **.NET**, reducing manual tracking errors by 30%.
- Applied rigorous **design standards** and engineering procedures for new **software features**, documenting designs using appropriate tools for organized and maintainable implementation, ensuring quality.
- Wrote comprehensive unit and integration **tests** using **JUnit** and **Mockito**, significantly increasing code coverage by 15% and minimizing post-release bugs.
- Managed relational databases, optimized complex queries in **PostgreSQL** to improve data retrieval speeds for analytical reports by 20% efficiently.
- Provided **on-call support** for **Garmin's 24/7 operations**, diagnosing and rectifying critical issues under tight deadlines, maintaining 99.9% system uptime effectively.
- Utilized **Git** for version control and **Jira** for **Agile** project management, improving team collaboration and feature delivery speed by 10%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Client-Facing Web Solutions

- Developed responsive front-end components for client web applications using **JavaScript**, **React**, and **HTML/CSS**, increasing user engagement by 12% effectively.
- Assisted in backend **software design and development** using **Node.js** and **Express.js** for RESTful APIs, supporting 2,000 active users effectively.
- Implemented data persistence layers with **MongoDB** for new features, ensuring efficient data storage and retrieval, reducing query times by 10%.
- **Troubleshooted basic issue reports** and performed routine **maintenance activities** on production systems, ensuring continuous service delivery with 98% uptime reliably.
- Reproduced reported software issues for root cause analysis, evaluated technical cause using **debuggers**, and implemented effective basic **software solutions**, improving system stability.
- Utilized **Git** for version control and adhered to company **design standards** for high code quality, reducing integration errors by 15%.

Skills

Languages: Java, Kotlin, C++, C#, Python, JavaScript
Frameworks & Tools: Spring Boot, Kafka, Jenkins, Docker, FastAPI, Spring MVC, .NET, JUnit, Mockito, Git, Jira, React, Express.js, HTML/CSS, Debuggers, Emulators, Simulators, Logic Analyzers
Cloud & Infra: AWS Lambda, PostgreSQL, MongoDB

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
