Neel Gali

AI Backend Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX | linkedin.com/in/neelgali

Professional Experience

AI Automation Engineer *Jun 2025 - Present*

Epik Solutions

- Engineered scalable **backend services** using **Python** and **LangChain**, processing 1000+ daily security events, reducing MTTR by 15 minutes for internal security teams.
- Built **RAG** pipelines with **LangGraph** over internal security knowledge bases to automate SOC triage, integrating security platforms and optimizing incident response, reducing manual effort by 40%.
- Implemented **LangSmith** for continuous **LLM evaluation frameworks**, enhancing model accuracy by 15%, ensuring reliable AI performance for critical security operations.
- Designed and deployed **microservices** on **AWS**, improving system resilience and scalability, maintaining 99.9% uptime, crucial for enterprise security platform operations.
- Resolved complex **distributed runbooks** issues through first principles across UAT and prod on **Linux** environments, boosting pipeline success rates by 25%, enhancing Live Site reliability for security teams.

Founding Engineer (FullStack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected multi-tenant AI compliance **SaaS** platform on **AWS** using **Python** for **backend** / AI engineering in a highly regulated compliance domain, **scaling to 10,000+ users** with tenant isolation.
- Built **LLM-powered compliance automation** with **LangChain**, **RAG pipelines** over Pinecone vector embeddings, and **AWS Bedrock**, reducing auditor effort by 70% and expediting evidence retrieval.
- Developed robust distributed **backend systems** using **Golang** and **PostgreSQL** with strict tenant isolation, supporting 15+ enterprise clients in a fast-paced **startup** environment.
- Implemented sophisticated **LLM evaluation frameworks** to validate AI-driven compliance logic, achieving 95% accuracy and ensuring high-quality evidence summarization.
- Engineered **data ingestion pipelines** (**Step Functions**, **Lambda**) for identity/activity data, populating graph-based access models and feeding **RAG** retrieval context to enhance security insights for clients.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built automated identity lifecycle system syncing 500+ employees across platforms, reducing provisioning time by 80% and eliminating manual effort.
- Developed full-stack features (**React**, **Golang**) for **MLOps** data labeling infrastructure, improving annotation throughput by 20% for crucial ML training pipelines.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab automation platform, supporting 500+ scientists and improving experimental data tracking efficiency.
- Designed and implemented 10+ core product modules (inventory, compounds) using **Ruby on Rails**, enhancing accurate tracking of complex experimental data.
- Authored 100+ test cases and resolved critical production **backend** issues, ensuring data integrity and maintaining system reliability in a **highly regulated** scientific platform.

Skills

Languages: Java, Golang, Python, TypeScript, JavaScript, SQL, C#, Ruby, Bash
AI / LLM: LangChain, LangGraph, RAG (Retrieval-Augmented Generation), LLM Evaluation Frameworks, LangSmith, AWS Bedrock, Vector Search
Frameworks: React, Node.js, Gin, Spring Boot, ASP .NET Core, GraphQL
Cloud & Infra: AWS, Azure, Linux, Docker, Kubernetes, Terraform, CI/CD, Jenkins
Databases: PostgreSQL, SQL, MySQL, MongoDB, Redis, OpenSearch, Pinecone, Neo4j
Practices: Microservices, REST APIs, System Design, Distributed Systems, Agile, TDD, SSDLC

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
