Lohit Gali

lohitgali@gmail.com

Summary

Computer Science Engineer with overall 5+ years experience in front-end develpment, data engineering, analytics, backend development, working across multiple startups. Skilled in **Python**, **SQL**, **Java**, **Databricks**, **Snowflake**, and data visualization tools like **Tableau** and **Power BI**. Adept at building scalable data pipelines, optimizing ETL workflows, and integrating enterprise solutions to drive data-driven decision-making

Skills

Programming Languages: Java, Ruby, **Python, R, SQL,** Bash
Data Engineering: Databricks, Snowflake, ETL, Data Pipelines, Apache Kafka
Databases: PostgreSQL, MySQL, Oracle, Snowflake
Big Data & Cloud: AWS (S3, EC2, RDS, Lambda, EKS, ECS, CloudWatch), Azure AD
Data Visualization: **Tableau, Power BI, Hadoop, Hive, Apache Airflow, Apache Spark, Flask, Apache Kafka, MS Excel** Jupyter Notebook, Excel, Docker, Kubernetes, Jenkins, Git, Jira, Agile
Other Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, Matplotlib, Seaborn, P lotly, NLTK

Experience

Senior Data Engineer, CIFC – Remote, Austin, TX Jul 2025 – present

- Developed and optimized **ETL pipelines** for **Enterprise asset management solutions**, handling high-volume data processing
- Designed **Data models** and implemented **Snowflake-based** warehouse solutions for real-time analytics
- Integrated **Databricks** for scalable data transformations, improving query performance by 30%
- Built interactive dashboards in **Power BI** and **Tableau**, enabling stakeholders to track key KPIs
- Automated data ingestion workflows using **Apache Airflow** and **Python**, reducing manual data processing by 50%

Data engineer, RHYM Tech – Remote, Stillwater, OK Aug 2023 – Jun 2025

- Built custom ETL pipelines to extract, transform, and load data for various clients, ensuring data integrity and performance
- Built and optimized **real-time data streaming solutions** using Apache Kafka to ingest **cybersecurity event data** from multiple sources for **threat detection and risk assessment**
- Engineered automated data quality checks and anomaly detection mechanisms to enhance the accuracy of **cyber risk quantification models**
- Implemented **role-based access control (RBAC)** and encryption strategies to ensure compliance with **cybersecurity regulations and data privacy laws**

Junior Data Engineer, ZeMoSo Technologies – Hyderabad, India Jul 2021 – Aug 2022

- Designed and maintained MySQL databases and created pipelines using **user-defined functions** and **stored procedures** for daily reporting tasks
- Developed **dashboards in Tableau** and presented data to **track KPIs and product performance** using data from various sources such as MS Excel, AWS S3, AWSRDS, AWS Redshift, JSON and XML
- Designed metrics for **A/B testing**, creating dashboards in Tableau to monitor test processes, analyzing test results, interpreting and giving recommendations to stakeholder
- Developed **Python scripts** to automate **data validation** and **data cleaning processes** such as deduplicating and checking data consistency using Pandas and **Apache Airflow**

Associate Developer, RHYM Tech – Hyderabad, India Jun 2019 – May 2021

- Built **scalable backend services** to process and analyze data for a **telecom client**, reducing processing time by 25%
- Collaborated with data scientists to deploy machine learning models for threat intelligence, integrating predictive analytics into the **cybersecurity monitoring framework**
- Developed SQL-based reporting solutions to track business metrics and customer insights

Projects

Enterprise Asset Management System – Arvam Tech

- **Problem**: Inefficient asset tracking and utilization in large enterprises
  Solution: Built a Snowflake-based data warehouse and Databricks-driven ETL pipelines, enabling real-time insights into asset performance. Designed Power BI dashboards for stakeholders, reducing asset downtime by 20%

Real-time Data Streaming for Biotech Automation – ZeMoSo Technologies

- **Problem**: Need for real-time experiment data tracking and processing
  Solution: Developed an Apache Kafka-based streaming system integrated with Snowflake, ensuring seamless data ingestion and analysis. Improved data processing speeds by 35%

Predictive Analytics for Telecom Data – RHYM Tech

- **Problem**: Cybersecurity threat intelligence data was fragmented across multiple sources, leading to inefficiencies in threat detection and response
  Solution: Developed a centralized data pipeline using Apache Kafka and AWS Glue to aggregate and normalize threat data, reducing threat analysis time by 40%.

Education

Master's in Computer Science, Oklahoma State University - Stillwater, OK May 2024
Bachelor's in Computer Science, Jawaharlal Nehru Technological University - Hyderabad, India June 2021
