Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Platform

- Architected and implemented scalable microservices using **Node.js** and **Express.js** on **AWS Lambda**, enhancing application performance by 35% for 10,000 active users.
- Developed responsive front-end components with **ReactJS** and **TypeScript**, integrating with **RESTful APIs** to improve user experience and reduce page load times by 20%.
- Designed and optimized complex relational databases using **PostgreSQL** and **SQL** queries, achieving a 40% reduction in data retrieval latency for critical reports.
- Mentored junior engineers on best practices for **JavaScript** development and **AWS** cloud deployments, increasing team productivity and code quality by 15%.
- Managed **CI/CD** pipelines using **GitHub Actions** and **Docker** for automated deployments, accelerating release cycles by 50% across multiple development environments.
- Implemented robust security protocols and access controls for cloud applications on **AWS**, ensuring data integrity and compliance for over 500 enterprise clients.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | B2B Platform

- Built and maintained dynamic user interfaces using **AngularJS** and **HTML/ CSS**, improving client-facing application responsiveness and user satisfaction by 25%.
- Developed backend services with **Python** and **Django REST Framework**, handling high-volume data processing and integrating third-party APIs efficiently for 500 daily requests.
- Migrated on-premise data stores to **AWS S3** and **DynamoDB**, reducing operational costs by 30% and enhancing data availability for analytics platforms.
- Optimized database performance by writing efficient **SQL** queries for **MySQL**, decreasing query execution times by 30% for critical business intelligence reports.
- Collaborated on full-stack feature development, from **JavaScript** frontend to **Flask** backend, delivering new functionalities 15% faster in an an agile environment.
- Implemented unit and integration tests using **Jest** and **Pytest**, ensuring code reliability and reducing production bugs by 20% across multiple modules.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | SaaS Platform

- Developed interactive web pages using **HTML5**, **CSS3**, and vanilla **JavaScript**, enhancing user engagement for client portals by 18% with new features.
- Designed and implemented **RESTful APIs** using **Java** and **Spring Boot**, facilitating data exchange between various microservices and improving system interoperability by 20%.
- Managed and optimized relational databases with **SQL Server**, performing data migrations and ensuring data consistency for applications supporting 10,000 transactions daily.
- Contributed to a high-traffic e-commerce platform by developing robust backend logic in **Python** using **Flask**, supporting 500 concurrent users effectively.
- Collaborated closely with QA teams to identify and resolve software defects using **Jira**, contributing to a 15% reduction in post-deployment issues and faster releases.

Skills

Languages: JavaScript, Python, TypeScript, Node.js, Java, HTML5, CSS3, SQL
Frameworks & Tools: ReactJS, AngularJS, Express.js, Django REST Framework, Flask, Spring Boot, GitHub Actions, Docker, Jest, Pytest, Jira
Cloud & Infra: AWS Lambda, AWS S3
Databases & Search: PostgreSQL, MySQL, SQL Server, DynamoDB
Concepts: Microservices, RESTful APIs, CI/CD, Agile

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
