Professional Experience

Automation Engineer (AI/ML Automation Specialist) *Jun 2025 - Present*

Epik Solutions

- Designed scalable microservices integrating security platforms, automating 40% of SOC workflows, reducing MTTR by 15 minutes for internal security teams using Python and AI/ML principles.
- Built real-time React-based analytics dashboards, aggregating 15+ system telemetry; eliminating 20+ hours/week manual reporting, improving C-suite decision latency with data visualizations.
- Developed AI-driven incident triage pipelines (Python, Azure OpenAI) processing 1,000+ daily security events, reducing analyst workload by 30% through advanced data processing.
- Automated cross-functional enterprise workflows via Power Platform, serving 500+ users, reducing operational cycle times by 40% with robust algorithms.
- Enhanced Live Site reliability by debugging distributed Golang runbooks; resolved silent execution failures, improving end-to-end pipeline success rates by 25% for critical data processing.

Founding Engineer (Full Stack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected multi-tenant AI compliance SaaS platform for 15+ enterprise clients, scaling to 10,000+ users on AWS with focus on scalability and tenant isolation.
- Designed distributed backend systems using Golang, AWS CDK, PostgreSQL, and Neo4j, ensuring strict tenant isolation across relational, graph, and object storage.
- Built LLM-powered compliance automation (AWS Bedrock, LangChain) for evidence collection and control scoring, reducing manual auditor effort by 70% using ML frameworks.
- Developed distributed data ingestion pipelines (Step Functions, Lambda) to integrate identity/activity data from enterprise systems into graph-based access models.
- Created full-stack React + GraphQL applications for compliance controls, identity graph visualization, and evidence management, providing rich analytics interfaces.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built automated identity lifecycle system syncing 500+ employees across UKG, JumpCloud, and Azure AD with serverless architecture, reducing provisioning time by 80%.
- Developed full-stack features (React, Golang) for MLOps data labeling infrastructure, improving annotation throughput by 20% for crucial ML training pipelines and data processing.

Software Engineer (Data & Algorithms) *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab automation platform used by 500+ scientists, leveraging React, Ruby on Rails, and PostgreSQL.
- Designed/implemented features across 10+ core product modules (inventory, compounds), enabling accurate tracking of complex experimental data using robust algorithms.
- Authored 100+ test cases and resolved critical production issues, ensuring data integrity and system reliability in a regulated scientific platform.

Skills

Languages: Python, SQL, TypeScript, JavaScript, Golang, C#, Java, Ruby, C++
Frameworks: TensorFlow, LangChain, React, Node.js, Spring Boot, GraphQL, ASP .NET Core, Ruby on Rails
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD
Databases: PostgreSQL, MongoDB, MySQL, Redis, Pinecone, Neo4j, OpenSearch
Tools & Methodologies: AI/ML, LLMs, RAG, numerical computing, data processing, algorithms, geospatial analytics, remote sensing, data visualizations, analytics interfaces, Git, Linux, Agile, Microservices, REST APIs, System Design, Object-Oriented Programming

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
