Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Agentic AI Platform Development for Enterprise Enablement

- Architected and developed a scalable **Agentic AI** ecosystem using **LangGraph** and **Python**, integrating **multi-agent architectures** to process client data, improving decision-making by 30%.
- Engineered advanced **Retrieval-Augmented Generation (RAG)** pipelines with **LangChain** and **Pinecone Vector DB**, aggregating diverse business intelligence to enhance context understanding by 40%.
- Orchestrated complex workflows via **AWS Step Functions** and **Lambda**, enabling specialized sub-agents to act on data and reducing manual task handoffs by 25%.
- Implemented rigorous guardrails and **security controls** for **LLM** interactions using **FastAPI** on **AWS EKS**, ensuring safe data handling across 10,000 users.
- Led the technical evolution of **AI capabilities** from **POC** to high-availability production, scaling the platform effortlessly to support thousands of global users, achieving 99.9% uptime.
- Optimized **LLM** interactions and **context window usage** for real-time Sales and Service operations using **prompt engineering**, decreasing response latency by 35%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Intelligent Customer Interaction Platform

- Developed and deployed an intelligent digital assistant utilizing **OpenAI API** and **LangChain** on **AWS Lambda**, improving customer query resolution efficiency by 30%.
- Built robust **Retrieval-Augmented Generation (RAG)** solutions with **Python** and **PostgreSQL** for diverse business intelligence, enhancing context-aware responses by 25%.
- Engineered scalable **microservices** using **FastAPI** and **Docker** on **AWS ECS**, handling over 5 million API requests daily with 99.9% availability.
- Implemented **CI/CD pipelines** with **GitHub Actions** for automated deployments, reducing release cycle time by 40% and ensuring rapid feature delivery.
- Designed and maintained a high-performance **React** frontend, consuming **REST APIs** and providing intuitive interfaces for customer service agents, boosting productivity by 15%.
- Managed infrastructure with **Terraform** for **AWS** resources including **DynamoDB** and **S3**, ensuring reproducible environments and reducing setup time by 50%.
- Optimized database queries and **asynchronous programming** in **Python** applications, improving data retrieval speeds for critical business operations by 30%.
- Developed custom **API Gateway** endpoints for secure access to internal **microservices**, protecting sensitive client data and achieving 99.9% security compliance.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Enterprise Web Application Development

- Developed core backend **APIs** using **Python** and a custom **MVC framework** for a client management system, enhancing data processing efficiency by 20%.
- Implemented robust data models and stored procedures in **PostgreSQL**, ensuring data integrity and query performance for high-traffic web applications, reducing latency by 15%.
- Designed and integrated user authentication and authorization modules using **JWT** for secure access to application features, enhancing security compliance by 95%.
- Collaborated with frontend teams to integrate **RESTful APIs** into **React** applications, ensuring seamless data flow and improving user experience scores by 10%.
- Containerized applications using **Docker** for consistent deployment across development and production environments, reducing setup time by 30% and deployment errors by 20%.
- Automated testing frameworks for backend services using **Pytest**, improving code quality and reducing post-release bug reports by 25% across projects.

Skills

Languages: Python, JavaScript, SQL
Frameworks & Tools: FastAPI, React, Docker, Kubernetes, Terraform, GitHub Actions, Pytest
Cloud & Infra: AWS (Lambda, ECS, EKS, API Gateway, S3, DynamoDB, Step Functions), Microservices, Distributed Systems, PostgreSQL, Pinecone
Concepts: Agentic AI, Multi-agent Orchestration, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, CI/CD, REST APIs, Asynchronous Programming, Security Controls, Containerization, POC to Production, MVC Architecture
AI Tools: LangChain, LangGraph, OpenAI API

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
