Neel Gali

neelgali7@gmail.com

Skills

Languages: Python, Java, JavaScript, Ruby, SQL
Frameworks: ReactJS, NodeJS, TensorFlow, OpenCV, LangChain
Tools: Docker, Kubernetes, Jenkins, Git, Jira
Methodologies and Practices: Agile, SDLC, MVC, REST, Maven, TDD, UML, LLMOps, Prompt Engineering

Experience

Graduate Teaching Assistant, Oklahoma State University – Stillwater, OK Aug 2023 – May 2024

- Assisted students in the Mobile Applications Development course with the development of various iOS apps using Swift, offering hands-on support and technical advice throughout the development process
- Offered one-on-one tutoring sessions, group discussions, and guidance to help students succeed in both theoretical and practical aspects of the courses, Evaluated student assignments, projects, and exams

Software Developer Intern, Monarch Tractor – Livermore, CA Jun 2023 – Aug 2023

- Implemented an automated employee management system for an Ag tech startup, decreasing HR manual tasks by 40% and saving roughly 150 hours per month as an independent intern
- Integrated Microsoft Excel, Power BI, and Access with Python and SQL to consolidate and analyze 500+ employee records from various databases into a centralized dashboard that provided real-time insights
- Streamlined data exchange across UKG, JumpCloud, and Azure AD APIs for user management, device provisioning, user group administration, licensing, and cron job execution using Python scripts
- Employed serverless AWS services like Lambda for serverless computing, S3 for efficient data storage and retrieval, and CloudWatch for real-time logging and monitoring along with Splunk, Grafana, Dynatrace

Full Stack Developer, ZeMoSo Technologies – Hyderabad, India Aug 2021 – Aug 2022

- Tracked the health of 15+ robots using React/Redux with NodeJS backend and Python scripts, collaborating with cross-functional teams in a biotech startup, which collected 100TB of data from its sensors
- Designed a deep learning model to detect and classify anomalies in the manufacturing process of 34+ industrial robots, reducing 83% of their monthly downtime
- Researched TensorFlow LSTM networks for speech recognition, OpenCV object tracking algorithms, and 11+ new technologies; enhanced 74% of a dancing robot's performance
- Conceived and created a machine learning algorithm that detects deviant behavior in robots using SIFT, HOG, and 20+ other computer vision methods
- Developed dynamic content using JavaScript, employing ES6+ features to write clean and efficient code, implement event handling, form validation, and AJAX requests to provide a seamless user experience

Related Coursework and certifications

Gen AI, Symplore Jul 2024 - present

- Working to integrate and deploy LLMs like GPT and BERT using framweworks like LangChain, LlamaIndex, CrewAI, approaches like prompt engineering, LLMOps for buidling scalable, production-ready applications

Explainable AI, Oklahoma State University May 2024

- Completed coursework in techniques like LIME, SHAP, uncertainty estimation and causal inference in GNNs

Deep Learning Specialization, Coursera Jun 2020

- Completed the Coursera specialization by Andrew Ng on neural networks and various related algorithms

An Introduction to AI, NPTEL Apr 2020

- IIT Delhi certified course on topics like search, logic, Bayes nets, and MDPs used to model a new problem

Practical Machine Learning with Tensorflow, NPTEL Oct 2019

- Applied Course Certified by Google and IIT Madras on building ML models using Tensorflow

Education

Master's in Computer Science, Oklahoma State University May 2024
