Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Cybersecurity Platform

- Led **ground up development** of secure **Go microservices** powering AI agentic security operations, enforcing authentication/authorization policies to dynamically defend enterprise systems against evolving cyber threats.
- Implemented advanced **SRE** practices, integrating AI-driven security monitoring with **Prometheus** and **Grafana** for predictive anomaly detection, improving incident response time by 25%.
- Designed and deployed enterprise-grade **Security Infrastructure** components using **IAM** and segmented **VPC** on **AWS**, reducing potential vulnerabilities by 40% in internal security audits.
- Optimized secure **Network Infrastructure** for data throughput using encrypted **gRPC** and **Kafka** streams, ensuring data integrity and confidentiality for critical enterprise security data.
- Developed secure, scalable data processing pipelines with **Python** on **AWS Lambda** and **S3**, feeding security event data to LLM-driven threat intelligence systems for rapid analysis.
- Managed secure containerized application deployments using **Kubernetes** on **AWS EKS** and **Docker**, achieving 99.8% service availability across 50+ enterprise microservices.
- Automated secure **CI/CD** pipelines with integrated security checks using **Jenkins** and **Terraform**, enforcing compliance and reducing deployment risks for enterprise **backend** services.
- Contributed to architectural decisions for resilient and secure enterprise systems, handling peak loads and improving concurrent user capacity by 50% while maintaining optimal performance.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | B2B SaaS Compliance Platform

- Developed and maintained scalable **Python RESTful APIs** using **Django** to power AI agentic compliance solutions, ensuring secure data exchange and adherence to industry standards.
- Designed and optimized **PostgreSQL** database schemas with compliance in mind, implementing granular access controls and data retention policies for sensitive B2B client data.
- Deployed and managed compliant **backend** applications on **AWS EC2** and **S3**, adhering to strict B2B SaaS security protocols and regulatory requirements for data integrity.
- Implemented compliant **CI/CD** pipelines using **Git** and **GitLab CI**, streamlining software delivery while ensuring auditability and adherence to B2B SaaS regulations.
- Contributed to **ground up development** of new **microservices** for enhanced features using **Python**, improving system modularity and future **scalability** by 25%.
- Designed AI agentic monitoring solutions leveraging **CloudWatch** for automated audit trails, proactively identifying and using LLMs to summarize compliance events and risks.
- Optimized existing codebase for **performance** and resource utilization, decreasing server costs by 15% through efficient **Python** programming practices.
- Collaborated with cross-functional teams in a **fast-paced** environment to deliver high-quality software, exceeding project deadlines by an average of 10%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Lab Operations Software

- Developed robust **backend APIs** using **Java** and **Spring Boot** for LabOps, facilitating secure data ingestion from scientific instruments and experimental workflows.
- Designed and implemented **MySQL** database solutions for LabOps, optimizing storage and retrieval of experimental metadata, lab inventory, and scientific results efficiently.
- Integrated third-party scientific services and lab equipment APIs, ensuring seamless data exchange and interoperability for complex experimental workflows and analysis.
- Developed **Python** data processing modules for LabOps analytics, transforming raw experimental data into actionable insights via automated agents for research and operational efficiency.
- Implemented automated unit and integration tests using **pytest** and **JUnit**, increasing code quality and reducing post-deployment bugs by 20% consistently.

Skills

Languages: Go, Python, Java
Frameworks & Tools: Kubernetes, Docker, gRPC, Kafka, Prometheus, Grafana, Jenkins, Terraform, Git, pytest, Spring Boot, Django
Cloud & Infra: AWS, EC2, S3, Lambda, CloudWatch, VPC, EKS, IAM, PostgreSQL, MySQL
Concepts: SRE, DevOps, Microservices, RESTful APIs, CI/CD, Scalability, Distributed Systems, Network Infrastructure, Security Infrastructure

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
