Professional Experience

Senior Backend Engineer *Jun 2025 - Present*

Epik Solutions

- Architected and implemented scalable microservices using Java, integrating enterprise security platforms and automating 40% of SOC workflows, reducing MTTR by 15 minutes for internal security teams
- Developed real-time analytics dashboards via robust RESTful APIs built with Spring, aggregating telemetry from 15+ systems to eliminate 20+ hours/week of manual reporting.
- Engineered incident triage pipelines with Java and SQL databases, processing 1,000+ daily security events and reducing analyst workload by 30% through efficient data processing
- Automated cross-functional enterprise workflows on UNIX systems using scripting and Java-based utilities, serving 500+ users and reducing operational cycle times by 40%
- Enhanced Live Site reliability by debugging and resolving silent execution failures in distributed Java applications, improving end-to-end pipeline success rates by 25% through rigorous testing

Software Engineer (Backend & Cloud) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected and built a multi-tenant SaaS platform backend using Java and Spring Boot, scaling to 10,000+ users per organization on AWS while ensuring scalability, tenant isolation, and high availability
- Designed distributed backend systems using Java, AWS CDK, Lambda, ECS, and PostgreSQL with strict tenant isolation across relational data layers, applying best practices for data integrity and security.
- Developed compliance automation modules utilizing Java for orchestration of evidence collection and summarization, reducing manual auditor effort by 70% by integrating with existing systems
- Created distributed data ingestion pipelines (Step Functions, Lambda) to process identity and activity data from enterprise systems into SQL-based models, ensuring data consistency with attention to detail.
- Developed robust GraphQL APIs for compliance controls and data visualization, utilizing Spring and Hibernate to manage complex data structures and support enterprise user interfaces

Software Development Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built an automated identity lifecycle system syncing 500+ employees across enterprise systems using Java and serverless architecture, reducing provisioning time by 80%
- Developed full-stack features (React, Spring) for MLOps data labeling infrastructure, improving annotation throughput by 20% for ML training pipelines

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab automation platform used by 500+ scientists, primarily working across Java Spring Boot and PostgreSQL in a microservices architecture
- Designed and implemented features across 10+ core product modules (inventory, compounds, batch tracking) using Hibernate and SQL
- Authored 100+ comprehensive test cases for Java services and resolved critical production issues ensuring data integrity and system reliability in a regulated scientific platform

Skills

Programming Languages: Java, SQL, Python, Golang, TypeScript, JavaScript
Frameworks & Libraries: Spring, Hibernate, .NET, React, Node.js, GraphQL, Ruby on Rails
Databases & Storage: PostgreSQL, MySQL, MongoDB, Redis, OpenSearch, Neo4j
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Git, UNIX
Tools & Methodologies: n8n, Power Platform, Agile (Scrum/Kanban), TDD, CI/CD, SRE, Analytical & Problem Solving

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
