Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Nagarro | Cloud Infrastructure & Compute Platform

- Architected and implemented a new internal compute platform using **Kubernetes** and **Go**, streamlining resource allocation for critical applications, reducing deployment time by 40%.
- Designed and deployed highly available **microservices** using **Python** and **gRPC** on **AWS EKS**, improving service uptime to 99.99% and scalability by 50%.
- Drove **build-vs-buy decisions** for observability stack, integrating **Prometheus** and **Grafana** into existing **AWS** infrastructure, achieving 25% cost savings.
- Enhanced **CI/CD pipelines** using **GitLab CI** and **Terraform** for infrastructure provisioning, reducing manual intervention by 70% and deployment errors by 15%.
- Participated in on-call rotation, resolving critical system incidents in **Linux** and **on-prem infrastructure**, ensuring service continuity with 95% SLA adherence.
- Developed a command-line tool in **Rust** to automate network diagnostics across **cloud platforms** and **on-prem**, decreasing troubleshooting time by 30% for SRE teams.
- Championed **DevOps practices** by automating environment provisioning with **Helm** charts and **Terraform**, decreasing setup time for new projects by 60% across the organization.

Software Engineer *Jul 2022 – Jun 2025*

Endava | Distributed Systems & Platform Engineering

- Developed a scalable data ingestion service using **Kafka** and **Python** on **AWS EC2**, processing 100M events daily, reducing data lag by 60%.
- Implemented **RESTful APIs** for external partners using **Java Spring Boot** on **Azure App Service**, increasing integration capabilities by 40% for new clients.
- Migrated monolithic applications to **microservices architecture** using **Docker** and **Kubernetes** on **GCE**, improving scalability and resilience by 35%.
- Built automated deployment scripts using **Bash** and **Ansible** for **on-prem infrastructure**, reducing manual deployment errors by 80% and deployment time by 50%.
- Designed and optimized **PostgreSQL** databases for high-traffic applications, improving query performance by 25% and ensuring data integrity for 5M active users.
- Collaborated with SRE teams to implement enhanced monitoring with **Grafana** and custom **Python** scripts, identifying system bottlenecks 20% faster.
- Contributed to architectural decisions for a new authentication service, leveraging **OAuth2** and **JWT** for secure user access, decreasing security vulnerabilities by 15%.
- Developed an internal tool using **Go** to manage **AWS S3** buckets and permissions, ensuring compliance and reducing manual administrative tasks by 30%.

Software Engineer *Jul 2020 – Aug 2022*

Brillio | Enterprise SaaS & Data Integration

- Developed and maintained data integration pipelines using **Python** and **Airflow** to process large datasets from various sources, improving data availability by 40%.
- Implemented **RESTful APIs** using **Java Spring Boot** for a core enterprise SaaS product, enabling seamless communication between services, supporting 100k daily transactions.
- Optimized database queries and schema designs for **MongoDB**, enhancing data retrieval speed by 30% and supporting 50% more concurrent users.
- Collaborated on a team project to containerize existing applications using **Docker**, reducing environment setup time for new developers by 60%.
- Built automated test frameworks using **Selenium** and **Python** for a web application, increasing test coverage by 70% and reducing defect escape rate by 20%.
- Managed version control using **Git** and configured **Jenkins** for continuous integration, reducing integration issues by 25% and accelerating release cycles.

Skills

Languages: Go, Python, Rust, Java, Bash

Frameworks & Tools: Kubernetes, Docker, Terraform, Helm, Prometheus, Grafana, Kafka, Spring Boot, gRPC, RESTful APIs, Git, GitLab CI, Jenkins, Ansible, Airflow, Selenium, OAuth2, JWT

Cloud & Infra: AWS, Azure, GCE, Linux, on-prem infrastructure, PostgreSQL, MongoDB

Concepts: Distributed Systems, CI/CD, DevOps, SRE, System Design, Microservices, Observability, Containerization, Infrastructure as Code, Operational Excellence, System Reliability, API Design, Architectural Decisions, Security

Education

Master's in Computer Science, Oklahoma State University, Stillwater

Bachelor's in Computer Science, JNTU Hyderabad, India
