Professional Experience

Senior Software Engineer *Jul 2025 – Present*
Globant | Financial Analytics Platform

- Led development of **Java Spring Boot** microservices for a high-performance financial analytics platform, enhancing data processing efficiency by 35% through optimized algorithms.
- Designed and implemented scalable **system architecture** utilizing **Docker** and **Kubernetes** to support low-latency data ingestion, improving system responsiveness for 5000+ daily users.
- Developed shared **Python** libraries for data aggregation and reporting, integrating with existing systems to streamline data delivery, reducing report generation time by 40%.
- Created responsive **Angular** front-end components for data visualization dashboards, improving user experience and enabling real-time insights for over 20 financial analysts.
- Implemented robust **CI/CD** pipelines using **Jenkins** and **Gradle** for automated testing and deployment, accelerating feature delivery by 30% across multiple environments.
- Optimized **SQL** queries and database schema for **DB2** and **Teradata** databases, significantly improving data retrieval performance for critical financial reports by 25%.
- Mentored junior engineers on **development and system architecture best practices**, improving team's code quality and reducing post-release defects by 15% through peer reviews.

Software Engineer *Jul 2024 – Jun 2025*
Nagarro | Enterprise Banking Applications

- Developed and maintained **Java Spring Boot REST APIs** for core banking services, processing 1M daily transactions and ensuring secure, reliable data exchange.
- Implemented automated testing frameworks using **JUnit** and **Mockito** for backend services, increasing code coverage to 90% and reducing regression bugs by 20%.
- Contributed to **Angular** front-end development, building interactive user interfaces for internal banking applications, enhancing workflow efficiency for 100+ operations staff.
- Managed code versioning and collaboration using **Git**, facilitating seamless integration of new features and reducing merge conflicts by 15% in a large team.
- Optimized database interactions with **DB2** using advanced **SQL** queries, improving data retrieval speeds for customer profile lookups by 30% daily.
- Authored **Shell Scripting** tools to automate deployment processes and server configurations, reducing manual setup time for new environments by 50%.
- Integrated **Gradle** into build processes, standardizing project dependencies and accelerating build times by 25% across various microservices and shared libraries.
- Integrated a **CI/CD** tool, **Jenkins**, to automate build, test, and deployment workflows, reducing release cycles by 20% and improving overall software delivery speed.
- Developed batch processing scripts in **Python** for daily reconciliation tasks against **Teradata** warehouses, ensuring data consistency and accuracy for 500,000 records.

Software Engineer *Jul 2021 – Aug 2022*
Persistent Systems | Client Data Management System

- Developed backend modules using **Java** and **Spring Boot** for a client data management system, handling 5000+ client records daily with high reliability.
- Designed and implemented relational database schema and optimized **SQL** queries for **PostgreSQL**, improving data access latency by 20% for critical client information retrieval.
- Wrote comprehensive unit and integration tests using **JUnit** and **Mockito** for application components, achieving 85% code coverage and ensuring system stability.
- Collaborated on feature development and bug fixes, managing code changes using **Git** for version control, ensuring smooth team collaboration and code integrity.
- Developed **Shell Scripting** utilities to automate daily data validation and report generation tasks, improving data consistency and reducing manual effort by 25% across client portfolios.
- Implemented new features based on client feedback, enhancing user interfaces and improving overall application workflow efficiency for 100+ internal users by 10%.

Skills

Languages: Java, Python, SQL, Shell Scripting
Frameworks & Tools: Spring Boot, Angular, JUnit, Mockito, Git, Gradle, REST APIs
Cloud & Infra: Docker, Jenkins, Kubernetes, DB2, Teradata, PostgreSQL
Concepts: CI/CD, System Architecture, Microservices, Automated Testing, Low-latency Systems, Workflow Efficiency

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
