Neel Gali

AI Platform Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX | linkedin.com/in/neelgali

Professional Experience

Senior Platform Engineer *Jun 2025 - Present*

Epik Solutions

- Designed scalable distributed systems and microservices, integrating security platforms, automated 40% of SOC workflows, reducing MTTR by 15 minutes for internal teams.
- Developed React-based analytics dashboards, aggregating telemetry from 15+ systems, improved decision latency for C-suite, eliminating 20+ hours/week manual reporting.
- Engineered Python-based AI agents and automated workflows for incident triage, processed 1,000+ daily security events, reducing analyst workload by 30%.
- Automated enterprise workflows using Power Platform, serving 500+ users, reduced operational cycle times by 40%, enabling efficient automated workflows.
- Enhanced Live Site reliability by debugging distributed systems in Golang runbooks, improved end-to-end pipeline success by 25% for production systems.

Lead AI Platform Engineer *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected a multi-tenant AI compliance SaaS platform on AWS, serving 15+ enterprise clients, scaled to 10,000+ users, demonstrating strong system design.
- Designed distributed backend systems (Golang, AWS, PostgreSQL, Neo4j) with strict tenant isolation, implemented robust system design for high performance services.
- Built LLM-powered AI agents (LangChain, AWS Bedrock) for compliance automation, orchestrated evidence collection, reducing manual auditor effort by 70%.
- Developed distributed systems for data ingestion pipelines (AWS Step Functions), integrated activity data from enterprise systems, feeding AI agents.
- Developed full-stack React + GraphQL applications for compliance controls, enabled identity graph visualization and evidence management for enterprise users.

Software Development Engineer Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built automated identity lifecycle system (AWS/Azure) syncing 500+ employees, reduced provisioning time by 80%, demonstrating strong backend engineering.
- Developed full-stack features (React, Golang) for MLOps data labeling infrastructure, improved annotation throughput by 20% for machine learning systems.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for cloud-based lab automation platform, serving 500+ scientists, leveraged PostgreSQL and microservices architecture for backend systems.
- Designed and implemented features across 10+ core product modules, enabled accurate tracking of complex experimental data for content platforms.
- Authored 100+ test cases and resolved critical production issues, ensured data integrity and system reliability in the backend engineering environment.

Skills

Languages: Python, Golang, JavaScript, TypeScript, C#, Java, SQL, C++
Frameworks: React, Node.js, ASP .NET Core, Gin, Spring Boot, LangChain, TensorFlow
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD
Databases: PostgreSQL, MongoDB, Redis, MySQL, Neo4j
Tools & Methodologies: Git, System Design, Distributed Systems, APIs, Microservices, Agile, Lanchain, Pydantic AI, MCP, n8n, AWS Bedrock, VoltAgent, Multimodal Inference Pipelines

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
