Neel Gali

Node.js Developer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI Communication Platform & Billing Systems

- Architected and developed new features for an **AI business communication platform** using **Node.js**, enhancing user engagement by integrating **OpenAI API** with 99.9% uptime.
- Implemented **microservices** for a complex **billing system** using **TypeScript** and **NestJS**, processing 100,000 transactions daily while reducing error rates by 15%.
- Designed and maintained robust **public APIs** with **OAuth2** for external partners, facilitating seamless **API-based integrations** and increasing partner adoption by 20%.
- Developed an intelligent agent system utilizing **CrewAI** and **LangChain** to automate customer support workflows, decreasing response times by 30% for 5,000 daily queries.
- Enhanced **system design** for **scalable web applications** by implementing **event-driven architectures** with **Kafka**, boosting message throughput to 50,000 messages/second.
- Led the integration of **internal management tools** with third-party services via **Webhooks** and **RESTful APIs**, improving operational efficiency for 20+ internal teams by 25%.
- Implemented comprehensive **testing frameworks** like **Jest** and **Mocha** for backend services, ensuring high **code quality** and reducing production bugs by 40%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise SaaS Backend & API Development

- Developed robust **Node.js** backend services for a core SaaS platform, using **Express.js** to handle 500,000 daily requests with 99.99% uptime.
- Designed and implemented various **RESTful APIs** supporting new product features and external integrations, improving data exchange efficiency for 10+ client applications.
- Contributed to a **microservices** architecture migration, refactoring monolithic components into independent services using **Docker**, improving deployment frequency by 50%.
- Implemented automated testing strategies with **Jest** and **Cypress** for backend and frontend components, increasing test coverage to 85% and reducing regression bugs by 20%.
- Managed and optimized **PostgreSQL** databases, including schema design and query tuning, supporting high-traffic applications handling 1TB of data monthly.
- Utilized **AWS** services like **EC2** and **S3** for deploying and managing backend applications, achieving 99.9% availability and reducing infrastructure costs by 10%.
- Collaborated with **cross-functional teams** in a **Scrum** environment, delivering new features bi-weekly and enhancing product capabilities for 2,000 active users.
- Integrated third-party payment gateways into the **billing system** using **secure code** practices, ensuring PCI compliance and processing $1M+ monthly transactions.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Web Application Development & API Services

- Developed and maintained **Node.js** backend for client-facing web applications using **Express.js**, serving 10,000 active users with low latency.
- Implemented **RESTful APIs** for mobile and web frontends, enabling data synchronization and real-time updates for over 50,000 daily user interactions.
- Built interactive user interfaces with **Angular** and **TypeScript**, enhancing user experience and improving conversion rates for a key product feature by 10%.
- Managed data storage and retrieval using **MongoDB** for various application modules, ensuring data integrity and improving query performance by 20%.
- Deployed applications to production environments leveraging **Nginx** and **Linux** servers, achieving 99.9% uptime and supporting continuous feature delivery.
- Participated in code reviews and utilized **Git** for version control, maintaining high **code quality** standards and facilitating collaborative development for a team of 5.

Skills

Languages: JavaScript, TypeScript, Python
Frameworks & Tools: OpenAI API, LangChain, CrewAI, Node.js, Express.js, NestJS, Angular, Git, Docker, Kafka, Nginx, Jest, Mocha, Cypress, Linux
Cloud & Infra: AWS, EC2, S3, PostgreSQL, MongoDB
Concepts: RESTful APIs, Microservices, Event-Driven Architecture, System Design, Software Architecture, Scrum, OAuth2, Webhooks, API-based integrations, Code Quality, Automation, Secure Code, Testing Frameworks

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
