Professional Experience

AI Automation Engineer *Jun 2025 - Present*

Epik Solutions

- Embedded directly with internal security stakeholders as **sole engineer** on the workstream, owning **technical design end-to-end** and automating 40% of SOC workflows, cutting MTTR by 15 minutes
- Built real-time **React**-based analytics dashboards aggregating telemetry from 15+ systems, eliminating 20+ hours/week of manual reporting and improving decision latency for C-suite stakeholders
- Developed AI-driven incident triage pipelines (**Python**, **n8n**, **Azure OpenAI**) processing 1,000+ daily security events, reducing analyst workload by 30% while ensuring **CI/CD** governance using **Terraform Sentinel**
- Shipped **drama-free** automation by resolving silent execution failures in distributed **Go** runbooks and hardening **TypeScript**/**Cypress** test suites for complex authentication flows, improving pipeline success rates by 25%
- Deployed and debugged services directly in client-facing **Azure** environments (**Docker**, **Kubernetes**, **GitHub Actions**), taking **ownership from design through production** incident response
- Partnered directly with security leadership to scope and prioritize a fast-moving automation roadmap, converting ambiguous asks into **shipped tooling within days** rather than multi-week sprint cycles

Founding Engineer (Full Stack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Joined as **founding engineer** and took **end-to-end ownership** of architecture and delivery for a multi-tenant **AI compliance SaaS** platform, scaling from zero to 15+ enterprise clients and 10,000+ users per org on **AWS**
- Made **independent technical-design calls** across the stack — **Golang**, **AWS CDK**, **Lambda**, **ECS**, **AppSync**, **SQS**, **PostgreSQL**, and **Neo4j** — with strict tenant isolation across relational, graph, and object storage layers
- Built LLM-powered compliance automation (**AWS Bedrock**, **LangChain**, **MCP**, **n8n**) to orchestrate evidence collection, summarization, and control scoring, reducing manual auditor effort by 70%
- Owned distributed pipelines ingesting 5M+ daily identity events into knowledge graphs, shipping a **GraphRAG**-based compliance chatbot that cut unauthorized user access footprints by 30%
- Instituted continuous **Cypress** smoke-tests within **GitHub Actions** to verify tenant-isolation boundaries pre-release, keeping launches **drama-free** across high-availability environments
- Iterated directly with enterprise customers during pilot rollouts to harden onboarding and configuration flows, cutting **time-to-first-value** from weeks to under 48 hours

IT Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built an automated identity lifecycle system syncing 500+ employees across **UKG**, **JumpCloud**, and **Azure AD** using (**AWS**/**Azure**) **Serverless** architecture, reducing provisioning time by 80%
- Engineered a **TypeScript** automation suite using **Cypress** to perform end-to-end validation of identity lifecycle transitions, resolving edge cases in cross-platform (UKG/Azure AD/JumpCloud) propagation

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab automation platform used by 500+ scientists, working across **React**, **Ruby on Rails**, **Spring Boot** and **PostgreSQL** in a **microservices** architecture
- Designed and implemented features across 10+ core product modules (inventory, compounds, batch tracking, LCMS uploads, container linkage), enabling accurate tracking of complex experimental data
- Engineered a custom **TypeScript** wrapper for **Playwright**/**Cypress** to perform automated 'proof-of-concept' validation, capturing DOM snapshots across complex scientific experimentation workflows
- Architected **RESTful APIs** in **Spring Boot** and **PostgreSQL** for inventory, batch-tracking, and container-linkage modules, reducing average query response time by 30% through schema and index optimization
- Collaborated directly with 500+ scientists to translate complex experimental workflows into sprint-ready engineering tasks, replacing manual spreadsheet tracking with production features

Skills

Languages: Python, Golang, TypeScript, JavaScript, SQL
AI & LLMs: Azure OpenAI, AWS Bedrock, LangChain, MCP, RAG, n8n
Frameworks: React, Node.js, Ruby on Rails, Spring Boot, GraphQL, Cypress, Playwright
Cloud & DevOps: AWS (CDK, Lambda, ECS, AppSync, SQS), Azure, Docker, Kubernetes, Terraform, GitHub Actions
Databases: PostgreSQL, Neo4j
Tools & Methodologies: Git, Linux, Agile (Scrum/Kanban), CI/CD, TDD

Education

Master's in Computer Science, Oklahoma State University, Stillwater *Aug 2022 - May 2024*
Bachelor's in Computer Science, JNTU Hyderabad, India *Jul 2017 - Jun 2021*
