Neel Gali

Software Engineer – Platform & Data Systems
neelgali7@gmail.com | +1 (475) 291-1455 | United States

Summary

Software Engineer with 2+ years of experience building and supporting **platform features, backend services, and Azure-based systems** used by data science and engineering teams. Strong background in **object-oriented design, C#, Java, Python, and Azure services**, with proven ability to translate data science workflows into reliable, production-ready platform capabilities. Known for strong collaboration, technical communication, and hands-on ownership across design, implementation, deployment, and debugging.

Technical Skills

Languages: C#, Java, Python, JavaScript
Frameworks & Runtime: .NET, RESTful services, object-oriented design
Cloud & Platform: Microsoft Azure (compute, storage, monitoring), cloud-native services
Data & ML Enablement: platform features for data science workflows, pipeline integration
Systems & Reliability: service integration, availability, fault isolation, debugging
Engineering Practices: code reviews, DRI ownership, CI/CD, deployments
Documentation & Communication: technical specs, runbooks, design documentation

---

Professional Experience

Epic Solutions
Software Engineer II
June 2025 – Present

- Designed and implemented **backend platform features** that supported internal analytics and data science workflows, enabling teams to move models and experiments into production reliably.
- Worked closely with **data scientists to understand end-to-end workflows**, translating experimentation and analysis needs into concrete platform requirements and features.
- Built and maintained **Azure-hosted services** using object-oriented design principles to ensure maintainability, extensibility, and clear ownership boundaries.
- Assessed new platform features through testing and staged rollouts before production deployment to reduce operational risk.
- Acted as a **directly responsible individual (DRI)** for selected services, owning deployments, monitoring, and production debugging.
- Authored concise technical documentation describing system behavior, interfaces, and operational procedures.
- Collaborated with partner teams to integrate dependent systems and improve **end-to-end reliability and availability**.

Samay Systems LLC
Software Engineer I
July 2024 – June 2025

- Developed **.NET and Java-based backend services** supporting internal platforms and data-driven applications.
- Implemented **service interfaces and integration logic** to connect multiple systems, improving platform stability and consistency.
- Worked alongside senior engineers and data stakeholders to refine requirements and validate platform behavior against real workloads.
- Contributed to **CI/CD pipelines and Azure deployments**, ensuring changes were safely promoted through environments.
- Participated in code reviews and debugging efforts, raising code quality and long-term maintainability.
- Supported production systems by investigating issues, identifying root causes, and implementing durable fixes.

Monarch Tractor
Software Development Engineer Intern
June 2023 – August 2023

- Built backend automation services to support internal operational workflows using Python and REST APIs.
- Integrated third-party and internal systems to form reliable, repeatable platform processes.
- Designed background jobs with validation, retry, and logging to ensure correctness and observability.
- Gained hands-on experience debugging live systems and improving reliability through better diagnostics.

ZeMoSo Technologies
Associate Software Engineer
July 2021 – August 2022

- Implemented backend APIs and services using object-oriented design principles.
- Built data-backed features requiring consistent behavior, schema design, and validation.
- Collaborated with cross-functional teams to deliver features from development through deployment.
- Participated in production support and incident analysis, strengthening debugging and analytical skills.

Education

Master of Science in Computer Science
Oklahoma State University

Bachelor of Technology in Computer Science
JNTU Hyderabad
