Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Autonomous AI Agents Platform

- Designed and scaled a new microservices-based architecture for **AI agents** using **Typescript**, **NodeJS**, and **AWS Lambda**, handling 10,000 concurrent agent executions, reducing latency by 35%.
- Developed responsive front-end components for intuitive **human-AI interaction** using **React** and **NextJS**, integrating complex agent state data for 5,000 daily users, improving engagement by 20%.
- Implemented advanced **prompting strategies** for diverse **large language model applications** on **OpenAI API**, improving agent decision-making accuracy by 15% across key tasks, processing 2M prompts daily.
- Led integration of **LangGraph** for complex **agent orchestration**, enabling sequential and parallel task execution within **autonomous digital workers**, boosting workflow efficiency by 25%.
- Collaborated with **AI partners** and **product teams** to prototype and iterate on new agent features, leveraging **A/B testing** frameworks to enhance user satisfaction by 18%.
- Optimized **AI infrastructure** deployments on **Kubernetes** via **CI/CD** pipelines, reducing build times by 40% and ensuring seamless, high-availability service updates for critical agents.
- Conducted applied research on novel **model alignment** techniques, translating findings into actionable improvements for core agent logic, reducing undesirable outputs by 10% for improved safety.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise SaaS Platform Development

- Developed and maintained core backend services using **NodeJS** and **Express.js** for an enterprise **SaaS platform**, processing over 100,000 API requests daily efficiently, increasing system throughput by 15%.
- Implemented responsive UI features with **React** and **Typescript**, enhancing the user experience for complex data dashboards, resulting in a 20% increase in user engagement.
- Designed and optimized **PostgreSQL** schemas for critical application data, improving query performance by 30% and supporting over 5 million customer records reliably for enterprise clients.
- Integrated **AWS S3** for secure document storage and retrieval, managing petabytes of user-generated content, achieving 99.9% availability for key services globally.
- Built robust **CI/CD** pipelines using **GitLab CI** and **Docker** for automated deployments, reducing release cycles from bi-weekly to daily with 95% success rate.
- Refactored legacy modules into scalable **microservices** architecture using **NodeJS**, enhancing maintainability and reducing operational costs by 10% annually for the platform.
- Explored and prototyped integration of **OpenAI API** for internal content generation tools, demonstrating potential for 15% efficiency gain in marketing material creation, post Nov 2022.
- Participated in **Agile** ceremonies and peer code reviews, ensuring high-quality software delivery and fostering **cross-functional collaboration** across product and design teams by 10%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Custom Software Solutions

- Developed and maintained robust backend services using **Java** and **Spring Boot**, handling critical business logic for enterprise clients, achieving 99.99% uptime reliably.
- Designed and implemented database schemas in **MySQL** for various client applications, optimizing data retrieval operations, reducing average query times by 25% for users.
- Built interactive front-end interfaces using **HTML**, **CSS**, and **JavaScript** with **jQuery**, enhancing user experience for internal dashboards by 15% for productivity.
- Contributed to a modular **RESTful API** architecture, enabling seamless integration with third-party systems and expanding platform functionality by 20% for partners.
- Managed code versions and collaborated effectively using **Git** workflows, ensuring clean merges and efficient team development practices across 5 concurrent projects.
- Deployed applications to **AWS EC2** instances, configuring security groups and load balancers to ensure high availability and reliability for 1000+ daily users.

Skills

Languages: Typescript, Python, JavaScript, Java, HTML, CSS
Frameworks & Tools: React, NextJS, Node.js, Express.js, Spring Boot, jQuery, Git, Docker, Kubernetes, GitLab CI
Cloud & Infra: AWS Lambda, AWS S3, AWS EC2, AWS, PostgreSQL, MySQL
Concepts: Microservices, System Design, Scalability, CI/CD, Agile, RESTful APIs, UX, Cross-functional Collaboration
AI Tools: LLMs, OpenAI API, LangGraph, Prompt Engineering, Agent Orchestration, Model Alignment, Autonomous Digital Workers, Human-AI Interaction, AI Infrastructure

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
