Neel Gali

Software Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Payment Solutions

- Designed and implemented robust **Microservices Architecture** using **Java** and **Spring Boot** for a critical transaction processing platform, enhancing system **Scalability** by 35%.
- Developed and secured **RESTful API** endpoints with **Spring Cloud**, incorporating **OAuth** and **JWT** for external partners, boosting **API Security** by 20%.
- Optimized data ingestion pipelines on **AWS** using **Apache Kafka** for real-time transaction streaming, decreasing processing latency by 40% for 10M daily events.
- Engineered persistent data layers with **Hibernate** and **JPA** for **PostgreSQL** databases, achieving 99.9% data **Reliability** for financial records.
- Implemented **Kubernetes** deployments leveraging **Docker** for efficient containerization and **DevOps** practices, reducing deployment time by 50% across multiple environments.
- Ensured **Full stack ownership** by writing **Testable Code** and conducting thorough code reviews, leading to a 25% reduction in production defects.
- Proactively performed root cause analysis on production incidents, implementing design changes and operational improvements to enhance system stability and maintain exceptional customer experiences, with **DevOps** principles.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Digital Banking Platform

- Led the development of **Java Microservices** for a digital banking platform, integrating complex business logic, improving feature delivery speed by 30% through **Agile**.
- Created high-performance **RESTful APIs** using **Spring Boot** to handle customer account transactions securely, processing over 1M requests per hour efficiently.
- Integrated payment gateways using **JPA** with **PostgreSQL**, ensuring data consistency and transactional integrity for critical financial operations, reducing errors by 15%.
- Implemented CI/CD pipelines with **Jenkins** for automated build and deployment processes on **AWS**, improving release frequency by 2x for new functionalities.
- Designed and optimized NoSQL data models in **MongoDB** for user profiles and preferences, enhancing data retrieval **Performance Optimization** by 25% for personalized experiences.
- Developed comprehensive unit and integration tests for new features, ensuring high code quality and reducing post-release issues by 20%, adhering to **Testable Code** standards.
- Applied architectural best practices in designing **Microservices** with **Spring Boot**, considering **Scalability**, **Reliability**, and **Performance Optimization** for core banking functions, supporting future growth requirements.
- Conducted rigorous code reviews, mentoring junior engineers on best practices and ensuring compliance with development standards, leading to a 10% improvement in overall code quality and maintainability.

Software Engineer *Aug 2020 – Aug 2022*

Zemoso Technologies | B2B SaaS Platform Development

- Contributed to backend development using **Java** and **Spring Boot** for a B2B SaaS platform, enhancing module functionality by 20% as per requirements.
- Developed and maintained **RESTful APIs** for client-facing applications, ensuring seamless data exchange and improving system responsiveness by 10% for users.
- Managed **PostgreSQL** database schema migrations and query optimizations for complex business reports, reducing report generation time by 30% for administrators.
- Participated in **Agile** sprints and code reviews, contributing to a collaborative development environment and enhancing code quality by 15% across the team.
- Implemented monitoring and logging solutions to ensure application **Reliability** and quickly diagnose issues, improving system uptime by 5% over previous metrics.
- Collaborated cross-functionally with product and QA teams to translate business requirements into technical specifications, ensuring high-quality software experiences and adherence to project standards throughout.

Skills

Languages: Java, python, C
Frameworks & Tools: Spring Boot, Spring Cloud, Hibernate, JPA, Apache Kafka, Kubernetes, Jenkins, Docker, RESTful API
Concepts: Microservices Architecture, API Security, OAuth, JWT, Agile, DevOps, Scalability, Reliability, Performance Optimization, Testable Code, Full stack ownership
Cloud & Infra: AWS, PostgreSQL, MongoDB

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
