Neel Gali

Software Developer 1

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Financial Technology Platform

- Led **software development lifecycle** initiatives for high-volume financial transaction processing, ensuring robust and scalable solutions using **Java** and **Spring Boot**, improving system reliability by 15%.
- Designed and implemented microservices architectures on **AWS Lambda** and **ECS** for new features, enhancing platform modularity and supporting 50M daily API calls.
- Conducted comprehensive **code reviews** and mentored junior engineers on **clean, efficient code** practices and system **design** patterns, boosting team productivity by 10%.
- Optimized critical backend services using **Kafka** for real-time data streaming and **PostgreSQL** for persistent storage, reducing query latency by 25% for users.
- Implemented advanced security protocols and data encryption standards across the platform, safeguarding sensitive customer financial data against 99% of threats.
- Managed CI/CD pipelines with **Jenkins** and **Docker** for automated **deployment** across environments, accelerating release cycles from bi-weekly to weekly.
- Troubleshot complex production issues, applying strong **problem-solving** skills and collaborating with cross-functional teams, reducing critical incident resolution time by 30%.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Enterprise SaaS Platform

- Developed and maintained core backend services using **Python** and **Django** for a scalable enterprise **SaaS** platform, serving 200K active business users daily.
- Implemented RESTful APIs for new module integrations, facilitating seamless communication between services and improving data exchange efficiency by 20%.
- Contributed to **software development lifecycle** activities, including **design**, **coding**, and **testing** of features, adhering to **agile development methodologies** and improving sprint velocity by 15%.
- Integrated external payment gateways using **Stripe API** and **OAuth** for secure transactions, processing over $5M in monthly payments reliably.
- Managed relational databases like **MySQL** and **PostgreSQL**, writing complex **SQL** queries and optimizing schemas, enhancing data retrieval performance by 30%.
- Utilized **AWS cloud platforms** like **EC2** and **S3** for infrastructure management and storage, ensuring high availability and scalability for services (99.9%).
- Performed system debugging and performance tuning for critical components, resolving 90% of reported bugs and reducing overall application load time by 18%.
- Participated in **code reviews**, applying **object-oriented programming** principles to ensure high-quality code and maintainability across the engineering team, reducing defects by 10%.

Software Engineer *Jul 2021 – Aug 2022*

Zemoso Technologies | Web Application Development

- Developed interactive user interfaces and frontend components using **React.js** and **JavaScript**, enhancing user experience for over 50,000 monthly active users.
- Implemented backend logic and APIs using **Node.js** and **Express.js**, adhering to **computer science principles** and ensuring data integrity for 10K daily transactions.
- Designed and optimized database schemas with **MongoDB**, creating efficient indexing strategies and improving data access speeds by 20% for applications.
- Utilized **Git** for version control and collaborative **coding**, contributing to a streamlined **software development lifecycle** and reducing integration errors by 10%.
- Applied strong **data structures** and **algorithms** knowledge to solve complex technical challenges, improving application performance and scalability by 15% overall.

Skills

Languages: Python, Java, JavaScript
Frameworks & Tools: Spring Boot, Django, Node.js, Express.js, React.js, Kafka, Jenkins, Docker, Git, Stripe API, OAuth
Cloud & Infra: AWS, AWS Lambda, ECS, EC2, S3
Databases & Search: PostgreSQL, MySQL, MongoDB, SQL
Concepts: Software Development Lifecycle, Microservices, Code Reviews, Clean Code, Design Patterns, CI/CD, Problem Solving, RESTful APIs, Agile Methodologies, Object-Oriented Programming, Computer Science Principles, Data Structures, Algorithms, Data Encryption

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
