Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Intelligent Finance Platform & Spend Management

- Designed and developed scalable **microservices** for a global corporate card platform using **Spring Boot** and **Kafka**, processing 50M transactions monthly, ensuring 99.9% uptime.
- Led implementation of a robust **GraphQL API** for intuitive spend management features, integrating with **React.js** frontend, improving data fetching efficiency by 30%.
- Architected and deployed an **AWS Lambda**-based real-time expense processing system with **Python**, reducing manual accounting tasks and processing time by 40%.
- Implemented CI/CD pipelines using **Jenkins** and **Docker** for continuous delivery of customer-facing products, accelerating deployment cycles by 25%.
- Optimized **PostgreSQL** database performance and data models for bill pay and travel software, achieving 2x faster query response times for users.
- Developed robust fraud detection modules utilizing **machine learning** principles and **AWS Sagemaker** to protect financial transactions, reducing fraudulent activities by 15%.
- Engineered a multi-tenant architecture using **Kubernetes** and **Terraform** for new market expansion, enabling seamless onboarding of 1000+ enterprise clients, enhancing scalability.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Enterprise SaaS Platform & FinTech Solutions

- Developed full-stack features for an enterprise SaaS platform using **Node.js Express** and **React.js**, enhancing user experience for 500k+ active users.
- Implemented **RESTful APIs** for core banking functionalities, integrating with third-party financial services, improving data exchange reliability by 20%.
- Optimized data retrieval from **MongoDB** for a real-time analytics dashboard, decreasing load times from 10 seconds to 2 seconds for critical insights.
- Contributed to design and implementation of event-driven architectures with **AWS SQS** and **SNS** for robust system communication, reducing message loss to 0.1%.
- Enhanced client-side code for a spend management application using **TypeScript**, improving application responsiveness and reducing bug reports by 18%.
- Deployed containerized applications using **Docker** and orchestrated them with **AWS ECS**, achieving 99.95% availability for critical services, supporting business impact.
- Developed data migration scripts in **Python** for a legacy system upgrade, ensuring data integrity and successful transfer of 10TB+ financial records.
- Monitored system performance and operability using **Prometheus** and **Grafana** dashboards, identifying and resolving bottlenecks, improving system efficiency by 10%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | B2B Software Development & Digital Transformation

- Developed and maintained back-end services using **Java** and **Spring Framework** for B2B digital transformation projects, serving 100+ clients reliably.
- Implemented user authentication and authorization modules with **JWT** and **Spring Security**, enhancing application security by 25% for sensitive data.
- Designed relational database schemas in **MySQL** for various client applications, ensuring data consistency and optimizing query performance by 15%.
- Created front-end components using **AngularJS** and **HTML/CSS** for customer-facing interfaces, improving user engagement metrics by 10%.
- Contributed to CI/CD pipeline setup using **GitLab CI** for automated testing and deployment, reducing manual deployment efforts by 30%.

Skills

Languages: Python, Java, JavaScript, TypeScript, HTML/CSS
Frameworks & Tools: Spring Boot, Node.js Express, React.js, AngularJS, Kafka, GraphQL API, Jenkins, Terraform, Prometheus, Grafana, Spring Framework, Spring Security, GitLab CI
Cloud & Infra: AWS Lambda, AWS Sagemaker, Kubernetes, Docker, AWS SQS, AWS SNS, AWS ECS
Databases & Search: PostgreSQL, MongoDB, MySQL
Concepts: Microservices, CI/CD, Data Modeling, Machine Learning, Multi-tenancy, RESTful APIs, Event-driven Architectures, System Performance Monitoring, User Authentication/Authorization, JWT

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
