Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Healthcare Innovation Platform

- Led the design and development of critical **Ruby on Rails** microservices using **PostgreSQL** for a new healthcare claims processing platform, improving data processing throughput by 30%.
- Architected and implemented scalable **Elixir** and **Phoenix** API endpoints for patient data exchange, ensuring high availability and processing over 100,000 requests per minute.
- Spearheaded front-end redesign efforts utilizing **React** and **Svelte** for an intuitive clinician dashboard, enhancing usability and reducing navigation time by 15%.
- Mentored junior engineers on best practices in full-stack development, **Agile** methodologies, and **CI/CD** pipelines, improving team code quality by 20%.
- Optimized database queries and schemas in **PostgreSQL** and **MSSQL** for a large-scale data analytics service, accelerating report generation by 40% annually.
- Implemented comprehensive automated testing strategies using **Cypress** and **RSpec** for web applications, reducing production bug occurrences by 25% significantly.
- Developed serverless functions on **AWS Lambda** using **Node.js** for secure patient data anonymization, reducing processing costs by 18% monthly.

Software Engineer *Jul 2023 – Jun 2025*

Samay Systems LLC | Digital Healthcare Solutions

- Developed and maintained full-stack features for a patient portal using **Ruby on Rails** and **React**, improving appointment scheduling efficiency by 15%.
- Built secure **RESTful APIs** in **Ruby** to integrate third-party medical device data, supporting over 50,000 daily data synchronizations securely.
- Contributed to front-end development using **JavaScript** and **Svelte** for a prescription management system, enhancing user experience and reducing errors by 10%.
- Designed and optimized **PostgreSQL** database schemas for new application modules, improving query response times by an average of 20%.
- Implemented robust unit and integration tests with **RSpec** and **Jest** within a **CI/CD** pipeline, decreasing regression issues by 25%.
- Refactored legacy codebases to improve performance and maintainability, reducing technical debt in key modules by 30%.
- Deployed and managed containerized applications using **Docker** on **AWS EC2**, ensuring scalable and reliable service uptime 99.9%.
- Collaborated with product teams to gather requirements for new features, ensuring technical solutions aligned perfectly with business goals 90% of the time.

Software Engineer *Jul 2021 – Aug 2022*

Zemoso Technologies | B2B SaaS Platform

- Developed core features for a business analytics platform using **Ruby on Rails** and **JavaScript**, contributing to a 5% increase in user adoption.
- Implemented responsive front-end components using vanilla **JavaScript** and **HTML/CSS** for improved user interface, boosting mobile engagement by 15%.
- Managed and optimized **PostgreSQL** database operations, including migrations and performance tuning, reducing query execution time by 10%.
- Wrote comprehensive unit tests with **RSpec** for backend services, ensuring code reliability and maintaining test coverage above 85%.
- Collaborated within a small team on various software development projects, adhering to project timelines and delivering features on schedule 90% of the time.
- Utilized **Git** for version control and actively participated in code reviews, ensuring code quality and collaborative development across 7 team members.

Skills

Languages: JavaScript, Ruby, Elixir, Python, Node.js
Cloud & Infra: AWS, AWS Lambda, AWS EC2, PostgreSQL, MSSQL
Concepts: Microservices, System Design, Unit Testing, Integration Testing, API Design, Scalability, Automated Testing
Frameworks & Tools: React, Svelte, Ruby on Rails, Phoenix, Jest, RSpec, Cypress, Docker, Git, HTML/CSS, RESTful APIs, CI/CD, Agile

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
