Neel Gali

AI Backend Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX | linkedin.com/in/neelgali

Professional Experience

AI Automation Engineer *Jun 2025 - Present*

Epik Solutions

- Engineered scalable backend services using Python and LangChain, processing 1000+ daily security events, reducing MTTR by 15 minutes for internal security teams.
- Developed advanced LangGraph workflows for automating SOC triage, integrating security platforms, optimized incident response, reducing manual effort by 40%.
- Implemented LangSmith for continuous LLM evaluation frameworks, enhancing model accuracy by 15%, ensured reliable AI performance for critical security operations.
- Designed and deployed microservices on AWS, improving system resilience and scalability, maintaining 99.9% uptime, crucial for enterprise security platform operations.
- Resolved complex distributed system issues through first principles across UAT and prod, boosting pipeline success rates by 25%, enhanced Live Site reliability for security automation.

Founding Engineer (FullStack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected multi-tenant AI compliance SaaS platform on AWS using Python for backend / AI engineering. Scaled to 10,000+ users, ensuring tenant isolation.
- Built LLM-powered compliance automation with LangChain and AWS Bedrock, reducing auditor effort by 70%, expedited evidence collection and control scoring.
- Developed robust distributed backend systems using Golang and PostgreSQL with strict tenant isolation, supported 15+ enterprise clients in a startup environment.
- Implemented sophisticated LLM evaluation frameworks to validate AI-driven compliance logic, achieved 95% accuracy, ensuring high-quality evidence summarization.
- Engineered data ingestion pipelines (Step Functions, Lambda) for identity/activity data, populated graph-based access models, enhancing security insights for clients.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built automated identity lifecycle system syncing 500+ employees across platforms, reduced provisioning time by 80% and eliminating manual efforts.
- Developed full-stack features (React, Golang) for MLOps data labeling infrastructure, improved annotation throughput by 20% for crucial ML training pipelines.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab automation platform, supported 500+ scientists, improving experimental data tracking efficiency.
- Designed and implemented 10+ core product modules (inventory, compounds) using Ruby on Rails, enhanced accurate tracking of complex experimental data.
- Authored 100+ test cases and resolved critical production backend issues, ensuring data integrity, maintained system reliability in a regulated scientific platform.

Skills

Languages: Python, Golang, TypeScript, JavaScript, SQL, C#, Ruby, Bash
Frameworks: LangChain, LangGraph, React, Node.js, Gin, ASP .NET Core, Spring Boot, GraphQL
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, CI/CD, Jenkins
Databases: PostgreSQL, MySQL, MongoDB, Redis, OpenSearch, Pinecone, Neo4j
Tools & Methodologies: LangSmith, LLM evaluation frameworks, Git, Linux, Agile, Microservices, REST APIs, System Design, Problem-solving, TDD, First Principles, SSDLC

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
