Neel Gali

AI Solutions Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Stillwater, OK

PROFESSIONAL SUMMARY

Highly motivated AI Solutions Engineer with 3+ years of experience leveraging technical and sales or customer-facing expertise to drive secure, governed, and connected AI use cases across enterprise environments. Proven ability to navigate the full AI lifecycle, from ideation and prompt engineering to deployment and monitoring, integrating advanced AI frameworks and RPA platforms to solve complex business challenges.

TECHNICAL SKILLS

AI & Automation: AI lifecycle, AI frameworks, Prompt Engineering, AI agent orchestration tools, Large Language Model (LLM) Integration, RPA platforms (UiPath, Blue Prism), Agentic AI Bot Development

Programming & Web Technologies: JavaScript (ES6+), Python, Software Development, Scripting Experience, DOM Manipulation, Event Handling, Asynchronous Programming, Web Scraping, Bash, PowerShell

Cloud & Integration: Multi-Cloud Platforms (MCPs), API Integration, AWS, Azure, Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions, Azure DevOps)

AI Governance & Security: AI Visibility and Governance Solutions, Compliance and Safe AI Adoption, Secure, Governed, and Connected AI Use Cases, SAML2, FIDO2

Data & Databases: SQL (MySQL, PostgreSQL), NoSQL (MongoDB, DynamoDB), Vector Databases

PROFESSIONAL EXPERIENCE

AI Solutions Engineer | Epik Solutions

Jun 2025 - Present

• Led client engagements to define and implement AI solutions leveraging RPA platforms and AI agent orchestration tools, improving workflow automation by 45% for enterprise level customers in technical environments, resulting in a 15% reduction in operational costs.

• Designed and implemented AI visibility and governance solutions to ensure compliance and safe AI adoption for sensitive data processing, establishing secure, governed, and connected AI use cases across client systems and reducing potential risks by 20%.

• Developed custom integration scripts using JavaScript (ES6+), performing DOM manipulation, event handling, and asynchronous programming to connect AI agents with legacy systems, enhancing data accuracy by 30% for critical business processes.

• Managed end-to-end AI lifecycle for client projects, from ideation and model development to deployment and monitoring, utilizing AWS and Azure MCPs to deliver robust solutions that met performance SLAs and improved customer satisfaction by 10%.

AI Solutions Consultant | Samay Systems LLC

July 2024 - Jun 2025

• Architected and deployed AI-assisted compliance workflows using advanced AI frameworks and prompt engineering techniques, integrating large language model integration with structured enterprise data to automate evidence collection and analysis, reducing audit preparation time by 25%.

• Developed custom API integration for various MCPs (AWS, Azure, GitHub, Jira), enabling secure, governed, and connected AI use cases for data validation and summarization across diverse client environments, boosting data ingestion efficiency by 35%.

• Contributed to the AI lifecycle by building Python services for data validation, feature engineering, and model training, applying strong analytical and problem-solving abilities to translate complex business objectives into measurable AI deliverables, accelerating solution development by 20%.

• Supported deployment and monitoring of cloud-native AI services using Docker, Kubernetes, and CI/CD pipelines on AWS, ensuring high availability and reliability for enterprise level customers, leading to a 99.9% uptime for production systems.

Machine Learning Engineer Intern | Monarch Tractor

Jun 2023 - Aug 2023

• Participated in the early stages of the AI lifecycle by developing Python-based scripting experience for preprocessing raw sensor and image data, creating training-ready datasets for perception and prediction tasks that improved model input quality by 15%.

• Supported the deployment and monitoring of computer vision models to cloud-hosted production environments, gaining exposure to practical aspects of the AI lifecycle and contributing to performance validation for autonomous systems, ensuring reliable inference outputs.

• Collaborated with cross-functional engineering teams to refine requirements for model outputs, utilizing strong communication and presentation skills to convey technical findings and validate solutions against operational constraints in a technical environment.

Associate Data Scientist | ZeMoSo Technologies

Jul 2021 - Aug 2022

• Contributed to backend services and ML-adjacent pipelines, applying software development and scripting experience to validate, enrich, and structure experimental data, enabling reliable downstream modeling and decision-making for a scientific operations platform.

• Supported Proof-of-Concept ML experimentation workflows by automating dataset preparation and feature generation, demonstrating strong analytical and problem-solving abilities to identify key insights in enterprise environments.

• Integrated CI/CD pipelines to validate models and enforce quality checks, promoting artifacts while maintaining auditability and security controls aligned with governance standards, improving deployment reliability by 20%.

EDUCATION

Master’s in Computer Science | Oklahoma State University, Stillwater, OK

Bachelor’s in Computer Science | JNTU Hyderabad, India
