Professional Experience

Automation Engineer *Jun 2025 - Present*

Epik Solutions

- Developed and maintained Go microservices for enterprise security, automating 40% of SOC workflows and reducing MTTR by 15 minutes for internal teams, enhancing software reliability.
- Engineered real-time React analytics dashboards, aggregating telemetry from 15+ systems. Eliminated 20+ hours/week manual reporting, improving C-suite decision latency and business operations.
- Designed Python-based incident triage pipelines, processing 1,000+ daily security events. Reduced analyst workload by 30% through automated testing and efficient data structures, boosting performance.
- Automated enterprise workflows via PowerShell and Power Platform, serving 500+ users. Reduced operational cycle times by 40%, enhancing business operations and system reliability.
- Enhanced Live Site reliability by debugging Go runbook failures in distributed systems, improving end-to-end pipeline success rates by 25%. Implemented robust monitoring and alerting solutions.

Founding Engineer *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected multi-tenant SaaS compliance platform for 15+ clients, scaling to 10,000+ users on AWS. Designed technology stacks ensuring high-quality, scalable, and reliable software solutions.
- Designed distributed backend systems using Go, AWS, PostgreSQL, and Neo4j. Implemented tenant isolation for relational/NoSQL databases, ensuring data integrity and system reliability.
- Developed compliance automation for evidence collection and scoring using Python. Reduced manual auditor effort by 70% through efficient data structures, contributing to software applications.
- Developed distributed data ingestion pipelines to process identity data into graph models. Ensured robust implementation, testing, and maintenance, contributing to backend systems.
- Developed full-stack React and GraphQL applications for compliance controls and data visualization. Contributed to all phases of the software development lifecycle, enhancing business operations.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built automated identity lifecycle system syncing 500+ employees across platforms using Azure Serverless architecture. Reduced provisioning time by 80% through technical design and implementation.
- Developed full-stack features (React, Go) for data labeling infrastructure. Improved annotation throughput by 20% for ML pipelines, applying data structures and algorithms development.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for robotic lab automation platform used by 500+ scientists. Utilized React, Ruby on Rails, and PostgreSQL in a microservices architecture for scalable software solutions.
- Designed and implemented features across 10+ product modules, enabling accurate tracking of complex data. Contributed to technical design, ensuring high-quality software applications.
- Authored 100+ automated test cases and resolved critical production issues. Ensured data integrity and system reliability, contributing to documentation and software performance.

Skills

Languages: Go, Java, Python, C#, TypeScript, JavaScript, SQL, Bash, C++
Frameworks: React, Node.js, Spring Boot, GraphQL, ASP.NET Core, Gin
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD
Databases: PostgreSQL, MongoDB, MySQL, Redis, Neo4j, OpenSearch
Tools & Methodologies: GIT, Agile, Scrum, Unit Testing, Integration Testing, Data Structures & Algorithms, Distributed Systems, SSDLC, System Design, REST APIs, Microservices, TDD, Linux

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
