Venkata Sai

Senior Software Development Engineer - AI Data Platform

venkatasai.jobs@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Synapse Staffing Solutions | Enterprise Gen AI Solutions

- Designed and implemented scalable **AI Data Platform** components using **Python** and **OCI Gen AI Services**, enhancing data processing throughput by 40% for enterprise customers.
- Developed advanced **RAG pipelines** leveraging **LangChain** and **Oracle 26ai** vector DB, enabling contextual AI responses with 95% accuracy for critical business queries.
- Architected and deployed **autonomous agents** with **CrewAI** and custom **SDKs** on **OCI**, automating complex data orchestration workflows, reducing manual effort by 60%.
- Optimized performance of **distributed data/AI systems** utilizing **PySpark** and **Delta Lake** on **Oracle Cloud Infrastructure**, achieving a 30% reduction in query latency.
- Provided expert architectural guidance for **complex data architectures**, integrating **HPC** and **MLOps** practices, leading to a 25% improvement in model deployment efficiency.
- Built **RESTful APIs** and **web app development** interfaces for **AI Data Platform** features using **Python**, ensuring seamless adoption for 20+ global enterprise clients.

Software Engineer *Jul 2022 – Jun 2025*

Axiom Digital Labs | Cloud Data Engineering

- Engineered robust **data pipelines** using **Spark** and **Hadoop** on **Oracle Cloud Infrastructure Big Data Service**, processing 50TB daily, enhancing data availability by 99.9%.
- Designed and implemented **scalable software components** for **AI/ML workloads** using **Python** and **OpenAI API**, integrating new functionalities, increasing user engagement by 15%.
- Developed and maintained **RESTful APIs** for a **distributed systems** data platform using **Java** and **Kafka**, supporting 10M concurrent requests with 200ms latency.
- Improved **model lifecycle workflows** by integrating **Feature Extraction** and **MLOps** practices, reducing deployment time for new models by 35% across the platform.
- Managed and optimized **large-scale databases** (**Nosql**, **PostgreSQL**) for critical business applications, ensuring 99.99% uptime and supporting millions of daily transactions.
- Implemented **CI/CD** pipelines with **Git** and **Docker** for data platform services, accelerating deployment frequency by 50% while maintaining high code quality.
- Configured and optimized network settings for **Oracle Cloud Infrastructure** services, ensuring secure and efficient data transmission, reducing network-related latency by 10%.

Software Engineer *Jul 2020 – Aug 2022*

Veridian Product Engineering | Enterprise SaaS Platform

- Built and maintained **web app development** features using **Python** and **Django**, improving user experience for an enterprise platform, boosting user retention by 10%.
- Developed robust **RESTful APIs** with **Java** and **Spring Boot**, handling 100K daily requests, ensuring seamless integration for multiple third-party applications.
- Designed and implemented **scalable software components** for core platform services, improving system reliability by 20% and supporting increased user load efficiently.
- Managed and optimized **PostgreSQL** and **MySQL** databases, ensuring data integrity and query performance for mission-critical applications, supporting 500K active users.
- Collaborated with cross-functional teams to troubleshoot and resolve critical system issues, improving platform stability and reducing incident resolution time by 20%. Shared knowledge effectively.
- Implemented performance optimizations for core **Python** and **Java** services, reducing average API response times by 10% while significantly enhancing scalability for peak user loads.
- Participated in code reviews and implemented **CI/CD** practices using **Git** and **Jenkins**, reducing bug occurrences by 15% and streamlining release cycles.

Skills

Languages: Python, Java, SQL

Frameworks & Tools: Spark, PySpark, LangChain, CrewAI, Hadoop, Kafka, Git, Docker, Django, Spring Boot, Jenkins, OpenAI API, Delta Lake

Cloud & Infra: Oracle Cloud Infrastructure (OCI), Oracle Cloud Infrastructure Big Data Service (BDS), Oracle 26ai, PostgreSQL, MySQL, Nosql

Tools & Methodologies: LLMs, Gen AI Services, MLOps, RAG pipelines, Feature Extraction, Model Lifecycle Workflows, Networking Concepts, Data Architectures, Scalability, Performance Optimization, autonomous agents, Orchestration pipelines, Distributed Systems, CI/CD, HPC, RESTful APIs, web app development, Troubleshooting

Education

Master's in Computer Science, Oklahoma State University, Stillwater

Bachelor's in Computer Science, JNTU Hyderabad, India
