Neel Gali

Backend Engineer (Mid-Level)

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI Automation Platform

- Designed and implemented highly scalable **RESTful APIs** for multi-agent **AI systems** using **Python** and **FastAPI** on **AWS**, improving response times by 35% for 1M daily requests.
- Architected and built critical **data pipelines** with **Kafka** and **AWS S3** for ingesting enterprise data, supporting **AI model training** and reducing data latency by 60%.
- Developed robust integration modules connecting **AI agents** with **Salesforce** and **SAP** via **OAuth2**, enhancing automation workflows for 50+ enterprise clients.
- Optimized **PostgreSQL** database performance and implemented **Redis caching** for frequently accessed data, reducing query execution time by 40% across core services.
- Implemented secure **RBAC** and **SSO** authentication for microservices, ensuring data integrity and compliance across the distributed **AI automation platform**.
- Leveraged **LangGraph** and **OpenAI API** to orchestrate complex **AI workflows**, automating business processes and achieving 25% efficiency gains for key operations.
- Implemented **CI/CD pipelines** using **Jenkins** for automated deployments to **AWS EKS**, significantly reducing release cycles by 40% and enhancing reliability.
- Integrated **vector databases** like **Pinecone** with **AI Model Servers** to enhance retrieval-augmented generation for LLMs, improving search accuracy by 30%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise Data Platform

- Developed and maintained high-performance **RESTful APIs** using **Python** and **FastAPI** to power a large-scale enterprise data platform, serving 500K daily users.
- Designed and optimized **PostgreSQL** database schemas and queries, significantly improving data retrieval efficiency by 30% for critical business intelligence reports.
- Built and deployed scalable **microservices** on **AWS EC2** and **Docker**, supporting asynchronous data processing and enhancing system modularity by 20%.
- Implemented **data pipelines** using **Python** scripts and **AWS S3** for data ingestion and transformation, reducing manual data preparation efforts by 45%.
- Integrated various third-party systems and APIs using **OAuth2** for secure data exchange, expanding platform capabilities and reaching 20% more data sources.
- Enhanced system reliability and **observability** by implementing comprehensive **monitoring** and **logging** solutions using **Prometheus** and **Grafana**.
- Contributed to architectural discussions for new features, focusing on **scalability** and performance, leading to the successful rollout of two major product updates.
- Utilized **Redis** for caching frequently accessed data, decreasing database load by 25% and improving overall application responsiveness for user interactions.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Custom Software Development

- Developed core backend services and **RESTful APIs** using **Python** with **SQLAlchemy** for client-facing web applications, supporting 10K concurrent users effectively.
- Designed and maintained **MySQL** and **PostgreSQL** databases, including schema migrations and query optimizations, improving data access speeds by 20%.
- Implemented secure authentication and authorization mechanisms (**JWT**) for user management, ensuring data protection and compliance across multiple projects.
- Collaborated on deployment processes, containerizing applications with **Docker** and assisting with cloud infrastructure setup on **AWS EC2** instances.
- Wrote extensive unit and integration tests using **Pytest**, contributing to a 15% reduction in production bugs and enhancing overall code quality.

Skills

Languages: Python, Go, Javascript, Typescript, C++, Java,
Frameworks & Tools: FastAPI, SQLAlchemy, Redis, Kafka, Prometheus, Grafana, Docker, Kubernetes, Pytest, Jenkins
Cloud & Infra: AWS, AWS S3, AWS EC2, AWS EKS, PostgreSQL, MySQL, Pinecone
Concepts: RESTful APIs, RBAC, SSO, OAuth2, JWT, Distributed Systems, Microservices, Caching, Scalability
AI Tools: LangGraph, OpenAI API, AI Model Servers

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
