# Neel Gali

neellohit69@gmail.com

## Skills

**Languages**: Python, Ruby, Java, C++, JavaScript, HTML, CSS, RPG II, RPG III, CL, Synon, SQL
**Frameworks**: TensorFlow, React, Ruby on Rails, SpringBoot, Node
**Cloud**: AWS—Lambda, S3, EventBridge, CloudWatch, EC2, Azure AD
**Tools**: Docker, Kubernetes, Redis, Git, Jira, MS Excel, Power BI, MS Access, Tableau
**Methodologies and Practices**: Agile, SDLC, MVC, REST, Maven, TDD, UML

## Experience

**Full Stack Developer** Oklahoma State University – Stillwater, OK Aug 2022 – May 2024

- Enhanced UI responsiveness, decreasing initial page load times by implementing lazy loading techniques for image-heavy content using React
- Optimized database queries using SQL, improving data retrieval speeds by 15% by adding indexes to frequently queried fields and refining pagination logic
- Reduced performance bottlenecks by refactoring APIs into fewer efficient endpoints using spring boot
- Resolved deployment-related issues by using Splunk, Dynatrace, and Grafana to monitor applications

**Software Developer Intern,** Monarch Tractor – Livermore, CA Jun 2023 – Aug 2023

- Implemented an automated employee management system for an Ag Tech startup, decreasing HR manual tasks by 40% and saving roughly 150 hours per month as an independent intern
- Integrated Microsoft Excel, Power BI, and Access with Python and SQL to consolidate and analyze large employee datasets from various databases into a centralized dashboard that provided real-time insights
- Streamlined data exchange across UKG, JumpCloud, and Azure AD APIs for user management, device provisioning, user group administration, licensing, and cron job execution using Python scripts and serverless AWS services.

**Full Stack Developer,** ZeMoSo Technologies – Hyderabad, India Aug 2021 – Aug 2022

- Created 30+ UI components, refactored microservices, and crafted test cases for a scientific experiment tracking platform in a service-based startup, working with cross functional teams in React and Ruby on Rails
- Improved user interface elements, driving a 10% improvement in design consistency by integrating new UI components into the custom library and replacing subsequent legacy implementations
- Developed and integrated new features for user roles and permissions management
- Resolved issues with non-persisting data in edit forms, reducing error reports by 5% by ensuring backend updates, maintaining UI consistency, and adding tests
- Conducted unit tests to validate individual components and integration tests to verify the interoperability of different system modules

**AS/400 Mainframe Intern** NetCracker Technologies – Hyderabad, India Jan 2021 – Jun 2021

- Contributed to the design and enhancement of ERP systems on the AS/400, utilizing Synon for code generation and ensuring alignment with business requirements
- Focused on maintaining, troubleshooting, and optimizing existing AS/400 applications, ensuring long-term stability and performance of critical business processes
- Developed a deep understanding of the AS/400 mainframe architecture, including system operations, database management, job scheduling and worked on projects to gain insights

## Related Coursework

**Explainable AI** – MS in Computer Science at Oklahoma State Jan 2023

- Completed coursework in Explainable AI, mastering techniques like LIME and SHAP for model interpretability and exploring advanced topics like uncertainty estimation and causal inference in GNNs

## Education

**Oklahoma State University** – MS in Computer Science May 2024
**Jawaharlal Nehru Technological University Hyderabad** – BS in Computer Science Jul 2021
