Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Data Platform Optimization

- Architected and implemented **Lakehouse architecture** using **Databricks**, **Delta Lake**, and **Apache Iceberg** for unified data access, improving data consistency by 35% across analytical systems.
- Developed advanced **PySpark** and **Spark SQL** ETL pipelines on **Databricks** for processing 50TB daily financial transactions, accelerating data availability by 40% for reporting.
- Designed and deployed data federation solutions with **Starburst/Trino** across **AWS S3** and **Snowflake** data sources, reducing query latency for federated datasets by 25%.
- Led initiatives for data governance, implementing **RBAC**, **metadata management**, and **data quality** checks within **Azure Data Lake**, ensuring 99.8% data integrity.
- Optimized **Spark** workloads on **GCP Dataflow** through partitioning strategies and cost-efficient processing, cutting computational costs by 20% while maintaining performance.
- Collaborated with ML teams to enable robust data pipelines for **AI/ML** and **RAG**-based use cases using **Databricks MLflow**, accelerating model deployment by 15%.
- Participated in **Agile** sprints, facilitating requirements gathering and backlog refinement with stakeholders to ensure data solutions aligned with business needs by 10%.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Financial Data Warehousing & Analytics

- Developed and maintained scalable **PySpark** ETL pipelines on **AWS Glue** and **S3** for ingesting diverse financial datasets, improving data freshness by 30% for analytics.
- Implemented data warehousing solutions using **Snowflake** for analytical reporting and business intelligence, supporting 150+ concurrent users with sub-second query response times.
- Performed extensive **performance optimization** for **Spark SQL** queries on **Databricks** clusters, reducing query execution times by an average of 25% for critical reports.
- Contributed to data governance initiatives, establishing robust **data quality** frameworks and lineage tracking for critical financial data, enhancing compliance by 20%.
- Assisted in designing and implementing **data models** for various analytics and reporting needs using Kimball methodology, improving report generation efficiency by 18%.
- Automated data ingestion processes using **Apache Airflow** and **Python** scripts, reducing manual effort by 70% and ensuring timely data availability for downstream systems.
- Managed cloud data platform resources on **Azure Data Factory** and **Synapse Analytics**, ensuring high availability and cost efficiency, reducing operational costs by 15%.
- Supported **AI/ML** data pipelines by preparing structured datasets from raw sources, accelerating data scientist's feature engineering time by 20% for model development.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Web & API Development

- Developed and maintained **Java** microservices using **Spring Boot** and **REST APIs** for a customer relationship management platform, handling 10,000 requests per minute.
- Designed and optimized relational database schemas in **PostgreSQL** for high-traffic applications, improving query performance by 30% for core business operations.
- Implemented data processing modules using **Python** and **Pandas** for batch processing customer activity logs, reducing processing time by 20% for daily reports.
- Integrated third-party APIs for payment gateways and communication services using **Node.js**, enhancing platform functionality and customer engagement by 15%.
- Contributed to **CI/CD** pipeline development using **Jenkins** and **Docker** for automated deployments, decreasing deployment time by 40% and increasing release frequency.
- Authored comprehensive technical documentation for APIs and system architecture, improving developer onboarding efficiency by 25% and reducing future maintenance overhead.

Skills

Languages: Python, PySpark, Spark SQL, Java, Node.js, SQL
Frameworks & Tools: Databricks, Delta Lake, Apache Iceberg, Snowflake, Starburst/Trino, Apache Airflow, Spring Boot, REST APIs, Pandas, Docker, Jenkins, MLflow
Cloud & Infra: AWS (S3, Glue), Azure (Data Lake, Data Factory, Synapse Analytics), GCP (Dataflow), PostgreSQL
Concepts: Lakehouse Architecture, Data Federation, Data Governance, Data Quality, Metadata Management, RBAC, Performance Optimization, Data Modeling, CI/CD, Agile

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
