Neel Gali

Senior AI Agent Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI-Driven Life Sciences Platform

- Architected and implemented advanced **AI orchestration layers** using **LangGraph** for complex multi-agent systems, driving operational workflows and autonomous self-correction by 15%.
- Developed high-precision **Text-to-SQL agents** leveraging **LLMs** and **PostgreSQL** schemas, translating natural language queries with 92% accuracy across large enterprise datasets.
- Designed and deployed scalable **RAG systems** integrating **Vector Databases** and structured data via **PageIndex**, enhancing semantic embedding and retrieval accuracy by 20%.
- Led migration of legacy services to a **microservices** architecture on **AWS Kubernetes**, improving system reliability by 30% and enabling high concurrency for AI workloads.
- Implemented robust automated evaluation pipelines using **Python** and **Jenkins**, measuring AI agent performance with metrics like task success rate, increasing output quality by 18%.
- Mentored junior engineers on **Java Spring Boot** and **Python** best practices, fostering team growth and increasing feature delivery speed for AI initiatives by 10%.
- Optimized **distributed systems** for **AI orchestration** using **Kafka** for asynchronous task queues, reducing end-to-end latency for critical workflows by 25%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise AI & Data Integration Platform

- Developed scalable backend services in **Java Spring Boot** for high concurrency, handling 500k requests/minute, optimizing performance and efficiency for data processing workflows.
- Integrated **OpenAI API** into internal applications using **Python** for generative AI features, improving content creation efficiency by 35% for marketing teams.
- Built and managed **RAG systems** using **Vector Databases** and **Elasticsearch** for semantic search across unstructured documents, improving retrieval accuracy by 20% post-implementation.
- Implemented data synchronization strategies between **PostgreSQL** and **Vector Databases** using **Python** scripts, ensuring data consistency for AI models with 99.9% uptime.
- Optimized **distributed systems** for critical data processing, leveraging **AWS Lambda** and **S3**, reducing execution time for large datasets by 40% annually.
- Designed **REST APIs** with **Spring Boot** for secure external system integration, facilitating seamless data exchange and enhancing platform interoperability for 10+ partners.
- Developed automated test frameworks using **JUnit** and **Mockito** for backend services, increasing code quality by 25% and reducing regression bugs by 15%.
- Contributed to **CI/CD** pipelines using **Jenkins** and **Docker**, streamlining deployment processes and accelerating feature release cycles by 20% quarterly.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | B2B Enterprise Web Solutions

- Developed robust backend modules using **Java Spring Boot** for a client management platform, improving transaction processing speed by 15% for 500+ daily users.
- Designed and implemented **REST APIs** for secure data exchange with third-party systems using **Spring Security**, enhancing integration capabilities for 5+ enterprise clients.
- Optimized database queries in **PostgreSQL** for critical application features, reducing report generation time from 10 minutes to 30 seconds for key stakeholders.
- Built data processing pipelines using **Python** for extracting and transforming client data, improving data ingestion efficiency by 20% and ensuring data quality.
- Participated in code reviews and adopted **Agile** methodologies, contributing to a 10% reduction in bug density and increasing team velocity by 12%.

Skills

Languages: Java, Python, SQL

Frameworks & Tools: Spring Boot, LangGraph, OpenAI API, Jenkins, Kafka, Docker, Kubernetes, REST APIs, JUnit, Mockito, Spring Security, Elasticsearch, PageIndex, LLMs

Cloud & Infra: AWS, Distributed Systems, Microservices, High Concurrency, S3, Lambda, PostgreSQL, Vector Databases

Concepts: AI Orchestration, Agentic Workflows, Multi-Agent Systems, RAG, Text-to-SQL, Automated Evaluation, Semantic Embedding, CI/CD, Agile

Education

Master's in Computer Science, Oklahoma State University, Stillwater

Bachelor's in Computer Science, JNTU Hyderabad, India
