Neel Gali

AI/ML Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI-Native Underwriting Platform

- Designed and implemented advanced **agentic workflows** for **underwriting decision-making** using **CrewAI** and **Python** with robust error handling, improving processing speed by 35% for high-value policies.
- Developed **ML/LLM systems** using **PyTorch** and **Hugging Face** models for submission triaging and intelligent routing, achieving 90% **accuracy** in identifying high-appetite business efficiently.
- Established robust **evaluation pipelines** on **AWS SageMaker** to validate **ML models** and **agentic workflows** with comprehensive testing, reducing deployment risks by 25% significantly.
- Engineered **monitoring systems** with **Datadog** and **Elasticsearch** for **production systems** using advanced dashboards, enabling real-time performance insights and reducing outage duration by 40%.
- Led **end-to-end ownership** of **ML models** from research to **production-ready** deployment on **Kubernetes** via **MLOps**, decreasing time-to-market for new features by 20%.
- Implemented **prompt engineering** techniques for **OpenAI API** integrations within customer-specific workflows, boosting solution adaptability and overall user satisfaction by 15%.
- Collaborated with **Data Science** teams to optimize **Feature Engineering** for **ML models** on **Apache Spark**, enhancing prediction **accuracy** by 12% across diverse and complex datasets.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Enterprise Data Analytics & SaaS Platform

- Developed **Python data pipelines** on **AWS Lambda** and **S3** for ingesting 10M daily compliance records reliably, reducing ingestion lag from 4 hours to 20 minutes.
- Designed and implemented **REST APIs** using **Java** and **Spring Boot** to serve **ML models** predictions, supporting 500+ concurrent requests with 99.9% uptime efficiently.
- Optimized **PostgreSQL SQL** queries for **ML models** feature stores, improving data retrieval latency by 60% for critical **production systems** and analytics.
- Utilized **Scikit-learn** and **Pandas** in **Jupyter** notebooks to develop classification **ML models**, achieving 85% **accuracy** in predicting customer churn for financial services.
- Deployed containerized applications with **Docker** and orchestrated using **AWS EC2** instances, ensuring **reliability** and scalability for 5+ **microservices** with zero downtime.
- Integrated **OpenAI API** (post-Nov 2022) for natural language processing features within client-facing **SaaS** applications, increasing user engagement by 20% across key modules.
- Implemented **CI/CD** pipelines using **GitLab CI** for automated testing and deployment to **Azure** cloud, reducing release cycles from bi-weekly to daily.
- Collaborated on **System Design** for a new data warehousing solution, handling 5TB of data monthly and improving report generation speed by 75% for analysts.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Digital Transformation & Cloud Solutions

- Developed scalable **REST APIs** using **Java** and **Spring Boot** for critical backend services and integration, handling 1M daily transactions with 99.8% uptime.
- Managed **MongoDB** and **PostgreSQL** databases, designing schemas and optimizing **SQL** queries to support enterprise applications, reducing data retrieval time by 45%.
- Implemented **CI/CD** pipelines with **Jenkins** and **Git** for automated deployments to **AWS** cloud, improving release efficiency and reducing manual errors by 30%.
- Built and maintained **data pipelines** for integrating customer data from various sources into a centralized warehouse, enhancing data availability by 95% reliably.
- Contributed to **System Design** discussions for new product features, ensuring **scalability** and maintainability for future expansions supporting 10K users effectively.
- Utilized **Docker** to containerize applications, streamlining development and deployment workflows across multiple **cloud environments**, cutting setup time by 50%.

Skills

Languages: Python, Java, SQL

Frameworks & Tools: OpenAI API, Hugging Face, CrewAI, PyTorch, Scikit-learn, Pandas, Apache Spark, Kubernetes, Docker, Git, Jupyter, Spring Boot, Datadog, Jenkins, GitLab CI

Cloud & Infra: AWS, Azure, Lambda, S3, EC2, SageMaker, PostgreSQL, MongoDB, Elasticsearch

Concepts: MLOps, CI/CD, REST APIs, Microservices, System Design, Data Pipelines, Experimentation, Prompt Engineering, Feature Engineering, Scalability, Reliability, Accuracy, Production Systems

Education

Master's in Computer Science, Oklahoma State University, Stillwater

Bachelor's in Computer Science, JNTU Hyderabad, India
