# Java Spring Boot Developer Resume

★★★★★ 4.20 /5 (Submit Your Rating)

## Austin, TX

---

SUMMARY:

- Over 8+ year of professional experience in development and deployment of various Object oriented and web - based Enterprise Applications using **Java/J2EE** technologies and working on the complete System Development Life Cycle (**SDLC**).
- Having very good understanding in Confidential Care and Insurance domain.
- Experience in application/web servers like **IBM Web Sphere, Web Logic Application Servers, JBoss** and **Tomcat Web Servers**.
- Proficient in n-tier application design and development using **Java, J2EE, JSP, Servlets, Struts 2.0, Spring** and **Oracle**.
- Expertise in Web development technologies like **HTML5, Angular JS/4, React JS, XHTML, DHTML, JAVASCRIPT, CSS3, XML** and **XSL/XSLT**.
- Experienced in developing complex **PL/SQL queries, Procedures, Triggers, Stored Procedures, Packages** and **Views** in various databases such as **Oracle, DB2** and **MySQL, SQL Server**.
- Good knowledge of Design patterns like **DAO, DTO** and Model View Controller.
- Working Knowledge in **JSON** and **XML** technologies such as **XSL, XSLT, XPath**, parsers like **SAX, DOM** and **JAXB**.
- Responsible for creating and maintaining architecture for **Restful API** using **Spring Boot**.
- Excellent in defect fixing, solving complex problems and Performance Tuning.
- Worked in developing Web Services (SOAP) using **JAX-WS.**
- Worked in Development teams under various roles such as Designer, Developer and Group Leader.
- Progressed through several project life cycles performing code development activities varying from UI design to Business functionality implementation.
- Developed applications using **Multithreading, Serialization, Externalization, Collections and Generics.**
- Used **Spring Boot** Actuator to monitor and manage the application in production environment.
- Good understanding on **Spark Streaming** with **Kafka** for real-time processing.

hire IT people
We get IT done!

- Implemented Kafka Custom encoders for custom input format to load data into Kafka Partitions. Real time streaming the data using **Spark** with **Kafka** for faster processing.
- Flexible committed individual with excellent interpersonal & communication skills, aiming to specialize in the fields of Java/J2EE.
- Good working knowledge on **CVS, SVN** and **Git** for version control.
- Strong understanding of common API technologies, such as **OAUTH**, **SAML**, **Spring Boot** and **Micro services**.
- Proficient in using **AWS (Amazon Web Services)** services like **EC2, VPC, Cloud Watch, Cloud Front, Cloud Formation, IAM, S3, Amazon RDS, Elastic Cache, SNS, SQS.**
- Active participation in entire lifecycle of software development. Activities include study of conceptual design as well as detailed design, coding, unit testing, system integration testing and support, and also supported software configuration management.
- Experience in the Agile (**SCRUM**) Development Process.
- End to end development support of the application till the final rollout of the application.
- Demonstrated excellent presentation and communication skills while conducting functional and technical training sessions.

**TECHNICAL SKILLS:**

**Languages:** Java, C, C++, XML, SQL.

**Methodologies:** Agile, Scrum, Test Driven Development (TDD).

**Web Technologies:** Servlets, JSP, Struts, SOAP and ReSTful Web Services, Applets, Java Swing, Java Beans, JMS, HTML, JavaScript, JQuery, XML (DOM and SAX parsers).

**Databases & ORM:** Oracle 9/10g (PL/SQL, SQL* PLUS, SQL Developer), MS SQL Server, JDBC.

**Web Frameworks:** MVC, Struts 1.x / 2.0, Spring 2.5 / 3.0, Spring Boot, Spring WS, Spring Rest, Dropwizard, Microservices.

**Operating Systems:** Windows 7 Professional, Windows NT/2000/XP, MS Windows (95/98), UNIX, Linux, MS-DOS.

**IDE Tools:** Spring Tool Suite, Eclipse, IntelliJ Idea.

**Servers:** JBoss, Tomcat 5.x/6.x, Glassfish, WebLogic Server 9/10.

**Reporting Tools:** MS-Excel, MS-PowerPoint.

**Version Control:** Bitbucket and SVN.

**Testing Tools:** Junit, Mockito, Spring Test Framework.

**PROFESSIONAL EXPERIENCE:**

**Confidential, Austin, TX**

**Java Spring Boot Developer**

**Responsibilities:**

hire IT people
We get IT done!

- Designed and developed a Restful APIs for different modules in the project as per the requirement.
- Used a light front-end framework against the **JSON API** for their service requests.
- Developed web pages using **HTML5, CSS3, Angular 4, Bootstrap, JSON, Ajax**.
- Creating **Typescript** reusable components and services to consume REST API's using Component based architecture provided by **Angular 4** and Used Webpack to build Typescript modules.
- Coordinate with all the teams for functional requirements and ensure compliance to all architecture standards.
- All the functionality is implemented using **Spring Boot** and **Hibernate ORM**. Implemented Java EE components using **Spring MVC**, **Spring IOC**, **Spring transactions** and **Spring security** modules.
- Contributed to the DevOps to automate the build and deployment process using **Jenkins, shell scripting, chef, Python, AWS Lambda, Cloud Formation Template.**
- Built on-premise data pipelines using **Kafka** and **Spark** streaming using the feed from API streaming Gateway REST service.
- Implemented the application using **Spring Boot** Framework and handled the security using **Spring Security**.
- Used Micro service architecture with **Spring Boot** based services interacting through a combination of REST and **Apache Kafka** message brokers and also worked with Kafka Cluster using **ZooKeeper**.
- Designed and developed Rest Based Webservices using **Jersey** framework.
- Developed applications using latest technologies like spring, hibernate (using annotations), and REST based Webservices, **XML API** and tools.
- Used spring framework for integrating the **MVC** components with business services.
- Implemented Data Access Layer (DAL) using Spring Data and **Hibernate** ORM tool.
- Design and development web-application for business reporting and systems monitoring and troubleshooting using **J2EE, Tomcat**.
- Strong experience of developing data models using Hibernate POJO's, configuring Hibernate persistence layer.
- Worked as a front-end web developer and **AngularJS** based application.
- Used **Angular JS** as framework to create a Single Page Application (SPA) which can bind data to specific views and synchronize data with server.
- Experienced in developing front-end systems with **JavaScript, Bootstrap, HTML5, MVC** frameworks such as **Angular JS.**
- Performed Web services testing between and third-party applications using Soap UI and performance functional testing of **REST API**s using **JMeter**.
- Spring Controllers were used with **Angular JS** to route the control to desired Java services
- Worked on Spring MVC Architecture for web applications.

hire IT people
We get IT done!

- Responsible for developing the full stack (from Markup, JavaScript, Application Services, Database, and Build Scripts)
- Configured and deployed the application using **Tomcat** and **Web Sphere**.
- Built Java applications using **Maven** and deployed JAVA/J2EE applications through Application servers.

**Environment:** Java 8, Python, RESTful Web Services, SOAP Web Services, Hibernate, Spring Core, Spring Data, Spring MVC, Spring Batch, Spring Boot, Eclipse IDE, Angular 4, Jenkins, AWS EC2, EBS, S3, VPC, WAS 6.0/7.0, JSP, JSTL, HTML5, CSS3, JavaScript, Web Sphere, Unix, Linux, UML, Rational Rose, Oracle, Maven, Jenkins, GIT, Spark, Scala, Design patterns, JMS, JUNIT, PowerMock, log4J, JSON.

**Confidential, Woodland Hills, CA**

**Senior Java Developer**

**Responsibilities:**

- Involved in the design and development phases of **Agile Software Development**.
- Developed java modules implementing business rules and workflows using **Spring Boot**
- Involves in Sprint planning for the estimation of efforts for user stories and bugs
- Designed and developed the REST based **Microservices** using the **Spring Boot**
- Designed table-less layouts using **CSS** and appropriate HTML tags as per W3C standards.
- Created optimized graphic websites and application interfaces using **HTML5**, **CSS3**.
- Worked with **CSS3 background, CSS Layouts, positioning, text, border, margin, and padding**.
- Involved in writing application level code to interact with APIs, Web Services using **AJAX, JSON** and **XML**.
- Designed **Single page web applications** using **AngularJS** and deployed into development.
- Used various J2EE design patterns, like **DTO, DAO,** and **Business Delegate, Service Locator, Session Facade, Singleton** and **Factory patterns** with the help of **Hibernate ORM**.
- Used Spring Core for **IOC** implemented using **DI** and developing **Restful web services**.
- Consumed **SOAP** based Web Services to integrate with the Web Application.
- Implemented Micro-services using Pivotal Cloud Foundry (PCF) platform build upon **Spring Boot** Services.
- Published and consumed Web Services using **SOAP, WSDL** and deployed it on WebLogic server.
- Used **SOAP** based messaging format to transfer requests and responses and validated the request and responses against XML Schema Definition.

hire IT people
We get IT done!

- Implemented CRUD operations from **Node JS** to **Cassandra** by using Cassandra driver.
- Using **Spark - Cassandra** connector to load data to and from **Cassandra**.
- Used SOAPUI tool extensive to conduct regression and performance testing of our services.
- Extensively used **Spring Bean Wiring, Spring DAO** and **Spring AOP modules.**
- Used **JERSEY** framework to implement the **JAX-RS** (Java API for **XML** and **RESTful Service**).
- Primarily focused on the spring components such as **Dispatcher Servlets, Controllers, View Resolver**.
- Providing the access to individual user for IBM MQ objects like Queue Manager and queues.
- Worked on JS framework that is **Backbone JS, Node JS, React JS** to augment browser applications with **MVC**.
- Involved in designing and developing the JSON, XML Objects with SQL Server.
- Used **GIT** for Source Control and Version Management of all codes and resources.
- Test and production Angular JS environment successfully using **Jasmine**.

**Environment:** Java/J2EE, Design Pattern, Servlets, JSP, JSF, JDBC, Spring Core, Spring Boot, Spring DAO, Hibernate, JavaScript, Ajax, Web Services, React JS, Spark, Cassandra, Express JS, Angular JS, Node JS, JSON, JUnit, HTML, CSS3, Bootstrap, Apache Maven build tool, PL/SQL, Linux, RESTful API, Grunt, GIT, Backbone JS, Jasmine.

**Confidential, Boston, MA**

**Senior Java Developer**

**Responsibilities:**

- Involved in analysis and design phase of Software Development Life cycle (SDLC).
- Used SVN as version controller.
- Involved in implementation of continuous build tool as Cruise control using ANT.
- Developed ANT scripts to build and deploy projects onto the application server.
- Used JNDI for connection pooling.
- Generating Unit Test cases with the help of internal tools Using JUNIT.
- Enhanced the design of an application by utilizing SOA.
- Created Hibernate mapping files, sessions, transactions, Query and Criteria to fetch the data from DB.
- Involved in creating queues, MDB, Worker to accommodate the messaging to track the workflows
- Involved in the configurations set for JBOSS servers, JMS queues and the deployment.
- Involved in reading & generating PDF documents using ITEXT. And also merge the PDF dynamically.

hire IT people™
We get IT done!

- Extensively used GOF Java and J2EE design patterns.
- Used JMS to pass messages as payload to track statuses, milestones and states in the workflows.
- Used jBPM to model the combination of business processes with business rules and complex event processing
- Integrated Drools with Spring container to push the dependency using Ant.
- Created DRL files to specify the business rules that to be fired on the operation flows.
- Used Drools to maintain single point of Business policy, simplify the complex logics & made it easy to be readable by BA's to update the rules based on the requirements.
- Involved in developing Restful Web Services using Jersey tool as wrappers to access existing business services by different channels.
- Used WSDL, SOAP, AXIS and JAX-WS technologies to create Web Services, generate stubs & consuming the existing services.
- Implemented Batch framework for records processing.
- Involved in spring programmatic transaction management using AOP and using Spring Batch.
- Used Spring Core to define beans for Services, Entity services and corresponding depended services.
- Used HTML, XHTML, DHTML, JavaScript, AJAX, JQuery, JSP and Tag Libraries to develop UI/view pages.
- Used Waterfall methodology as Software Development model for the project.
- Analysis of Business Requirements and Technical Requirements.

**Environment:** JAVA/J2EE, Eclipse, JBOSS, Spring framework - DI, AOP, Batch, Hibernate, HTML, JS, AJAX, JSP, XML, XSLT, XPATH, XQuery, JQuery, WSDL, SOAP, JAX-WS, AXIS, REST, JAX-RS, Jersey, Drools, jBPM, JMS, SVN, JNDI, JUNIT, ANT.

**Confidential,Stanley, NY**

**Java/J2EE Developer**

**Responsibilities:**

- Involved in various phases of Software Development Life Cycle (**SDLC**) of the application like Requirement gathering, Design, Analysis and Code development.
- Worked extensively with the backend which comprised of **Spring, Hibernate** and **JPA**.
- Worked with **Spring MVC** and **Hibernate** in the backend to build the business logic.
- Consumed **SOAP** based Web Services to integrate with the Web Application.
- Used **JSON** and **XML** formats to transfer data from the server.
- Developed Data Access Layer using **Hibernate** and **DAO Design Pattern**.
- Experience in implementing Web Services such as **SOAP** using **WSDL**.

hire IT people
We get IT done!

- Used **JMS** for loosely coupled, reliable and asynchronous exchange of information among J2EE components.
- Used **Maven** to employ standard conventions and practices to accelerate the development cycle.
- Created connections to database using **Hibernate session Factory**, using **Hibernate APIs** to retrieve and store data to the database with **Hibernate transaction control**.
- Utilized **Spring MVC** framework to implement design patterns like IOC (Dependency Injection), Spring DAO (Data access objects), Data Transfer objects, Business objects, ORM Mappings.
- Developed **Servlets** and **JSP** for performing **CRUD** operations on domain specific entities.
- Developed test cases and performed unit test using **JUnit** Framework.

**Environment:** Java, J2EE, Spring MVC, IOC, Hibernate, Oracle, Maven, JMS, Eclipse, AJAX, JSP, HTML, CSS, Java Script, XML, Servlets, Design Patterns, JUnit, Apache POI, Web Services.

**Java Developer**

**Confidential**

**Responsibilities:**

- Involved in the software development life cycle requirement gathering, coding, testing, and implementation.
- Worked on the **Java Collections** API for handling the data objects between the business layers and front end.
- Generated Use case diagrams, Class diagrams, and Sequence diagrams using **Rational Rose**.
- Developed the applications using **Java, J2EE, Struts, JDBC.**
- Implemented server side programs by using **Servlets** and **JSP**.
- Developed **JSP** as the view, **Servlets** as Controller and **EJB** as model in the Struts Framework.
- Developed in **C/C++** on **Linux** and Cross-platform systems.
- Developed the front end UI using **HTML, JavaScript, CSS** and **AJAX**.
- Used **JavaScript** to perform Client Side Validation.
- Used **Eclipse** as the IDE and **Web Logic** as the application server.
- Implemented the database connectivity using **JDBC** with **MYSQL** database as backend.
- Used **Log4j** framework to log/track application.
- Involved in **JUnit** Testing, debugging, and bug fixing.
- Deployed Applications on Apache Tomcat Server.

**Environment:** Java / J2ee, JSP, servlets, EJB 2.0, SQL Server, DOM parser, JAVA APIs, ANT script, Oracle 9i, JBoss & Web Logic Server 6, JavaScript SAX.
