Neel Gali

Java Full Stack Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Software Engineer *Jun 2025 - Present*

Epik Solutions

- Developed scalable Java Spring Boot microservices with RESTful API endpoints and Oracle database integration, applying secure coding standards that reduced API-level vulnerabilities by 30% in prod.
- Deployed Spring Boot applications on AWS (EC2, RDS Oracle, S3), configuring auto-scaling and IAM security policies to sustain 99.9% uptime for 10,000+ daily active enterprise users.
- Containerized Java microservices with Docker, orchestrating Kubernetes deployments via Jenkins CI/CD pipelines and cutting enterprise release cycle time from two weeks to three days.
- Collaborated in Agile sprint ceremonies, delivering 5+ Java backend features per sprint following compliance and secure coding standards with peer code reviews across cross-functional teams.
- Integrated Java Spring Boot backend APIs with React.js front-end modules, applying Spring Security and RESTful service patterns to support 10,000+ enterprise users with sub-100ms response times.

Full Stack Engineer (AI/Search) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected React.js dashboards for identity and compliance visualization, collaborating with Java back-end engineers on RESTful API contracts ensuring consistent data flow for 10,000+ enterprise users.
- Built Java Spring Boot compliance APIs with Spring JPA/Hibernate and Spring Security over Oracle database, processing 10K+ records monthly and cutting manual auditor effort by 70%.
- Leveraged Redis for distributed session caching and Elasticsearch for full-text search across multi-tenant data, cutting average query response time by 45% under peak concurrent enterprise load.
- Designed distributed Java microservices backend applying circuit breakers, retry logic, and tenant isolation patterns that sustained 99.9% uptime across 15+ enterprise client deployments.
- Provisioned AWS infrastructure (ECS, RDS Oracle, Lambda) with Terraform IaC, enforcing CI/CD best practices and reducing manual deployment errors by 40% across all client environments.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Wrote Python and Shell scripting data pipelines for MLOps labeling infrastructure, automating annotation workflows and boosting overall throughput by 20% across 500K+ agricultural training data.
- Deployed serverless CI/CD data delivery pipelines integrating Docker containers and version-controlled datasets, sustaining model training across 3 production systems with 40% fewer pipeline failures.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Built Java Spring Boot services with Spring JPA/Hibernate over Oracle database, designing RESTful endpoints that tracked complex experimental data for 500+ scientists across 10+ product modules.
- Built React.js SPA feature modules with centralized error handling and async REST API integration, ensuring accurate data display for a regulated scientific platform used by 500+ scientists.
- Authored 100+ JUnit automated test cases, resolved critical Java production bugs via systematic profiling and debugging, reducing regression incidents by 35% and improving platform data integrity.

Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, Bash
Back-End & Frameworks: Spring Boot, Spring JPA/Hibernate, Spring Security, Node.js, GraphQL, Gin
Front-End: React.js, HTML5, CSS3, ES6+, NPM
Databases: Oracle, PostgreSQL, MySQL, Redis, Elasticsearch, MongoDB, OpenSearch
Cloud & DevOps: AWS (EC2, RDS, ECS, Lambda, S3), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD
Practices: Microservices, RESTful APIs, Secure Coding (OWASP), Agile/Scrum, JIRA

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
