Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Real Estate Investment Analytics Platform

- Developed **predictive analytics** models using **Python** and **Scikit-learn** for identifying **high-growth markets**, improving **capital deployment** accuracy for multifamily assets by 18%.
- Designed **geospatial analysis** pipelines in **AWS SageMaker** to integrate **demographic** and **economic migration trends**, enhancing market sizing precision by 15%.
- Implemented **advanced pricing** and **segmentation models** with **TensorFlow** on **Google Cloud AI Platform**, optimizing **rent growth** and **occupancy** by 7%.
- Created **data visualization** dashboards using **Tableau** for **actionable investment insights** on **tenant spend patterns**, facilitating portfolio strategy adjustments by 10%.
- Led the **development** of an **agentic AI** system using **LangChain** and **OpenAI API** for automated **market intelligence** report generation, reducing analyst time by 25%.
- Built **data-driven underwriting inputs** engine with **Python** and **Pandas** to support **acquisitions** and **development**, improving investment decision confidence by 12%.
- Engineered a **Tenant Insights** platform with **Apache Spark** on **AWS EMR** to model **preferences** and **price sensitivity**, boosting tenant retention rates by 6%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise Data & Analytics Platform

- Constructed scalable **ETL** pipelines using **Apache Spark** on **AWS S3** and **AWS Lambda** for **consumer datasets**, processing 50M records daily with 99.9% accuracy.
- Developed **statistical modeling** frameworks in **R** and **Python** (**NumPy**, **Pandas**) to analyze **renter behavior**, providing insights that informed product design by 8%.
- Designed and maintained **data warehousing** solutions in **Snowflake** for **investment strategy** reporting, enabling cross-functional teams to access data 30% faster.
- Implemented **A/B testing** infrastructure with **Python** and **SQL** to evaluate new **product design** features, resulting in a 5% increase in user engagement.
- Built **RESTful APIs** using **Node.js** and **Express.js** to expose **predictive analytics** results, integrating with internal dashboards for 20% efficiency gain.
- Collaborated on a **CI/CD** pipeline using **Jenkins** and **Docker** for **machine learning** model deployment, reducing deployment time from hours to minutes by 70%.
- Created **data visualization** tools using **Looker** for presenting **market intelligence** reports, improving data consumption and decision-making for stakeholders by 15%.
- Utilized **OpenAI API** with **Python** for generating preliminary **demographic** summaries from unstructured text, enhancing data enrichment processes by 10%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Custom Software Development & Data Services

- Developed backend services with **Java** and **Spring Boot** for **data integration** from various sources, handling 1M transactions daily with 99.8% uptime.
- Designed and optimized **SQL** queries for **PostgreSQL** databases, improving data retrieval performance for reporting applications by 40%.
- Implemented **REST APIs** using **Python** and **Flask** for client-facing applications, enabling seamless data exchange and supporting 10K active users.
- Managed **Git** version control workflows for a team of 5 engineers, ensuring code integrity and facilitating parallel **development** efforts by 25%.
- Contributed to **system design** for a scalable **enterprise SaaS platform** using **microservices architecture**, supporting growth to 20+ clients.
- Created automated **data validation** scripts in **Python** for ingested **consumer datasets**, reducing manual data cleaning efforts by 35% weekly.

Skills

Languages: Python, R, Java, SQL, Node.js

Frameworks & Tools: Scikit-learn, TensorFlow, Pandas, NumPy, Apache Spark, Docker, Jenkins, Git, Flask, Spring Boot, Express.js, Tableau, Looker, LangChain, OpenAI API

Cloud & Infra: AWS S3, AWS Lambda, AWS SageMaker, AWS EMR, Google Cloud AI Platform, Snowflake

Concepts: Predictive Analytics, Statistical Modeling, Geospatial Analysis, Advanced Pricing, Segmentation Models, Data Visualization, Market Intelligence, Data-driven Underwriting, Tenant Insights, ETL, Data Warehousing, A/B Testing, RESTful APIs, CI/CD, Machine Learning, Data Integration, System Design, Microservices Architecture

Education

Master's in Computer Science, Oklahoma State University, Stillwater
