Neel Gali

AI Software Engineer – Cloud AI Platforms

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Cloud AI Operations Platform

- Designed and implemented core components of an **AI-powered operational platform** using **Python** and **Kubernetes**, integrating **LLM frameworks** to automate complex incident response by 45%.
- Led the development of **AI-driven workflows** for cloud infrastructure management, leveraging **AWS Lambda** and **OpenAI API** to reduce manual intervention in system alerts by 60%.
- Developed scalable **Typescript microservices** and **REST APIs** on **Azure** for real-time data ingestion, processing 50M daily events to feed AI models accurately and efficiently.
- Implemented **prompt engineering** techniques and **PII redaction** solutions for sensitive data, ensuring compliance and enhancing model safety and reliability by 99.8%.
- Orchestrated **CI/CD pipelines** using **GitHub Actions** and **Docker** for seamless deployment of **AI models**, reducing release cycle time from weeks to just 2 days.
- Contributed to building a multi-tenant **cloud AI platform** leveraging **GCP** and **TensorFlow** for diverse client operational needs, achieving 99.9% uptime and scalability.
- Developed **LangGraph**-based agentic AI systems for dynamic operational task automation, processing intricate workflows across monitoring and ticketing tools, reducing resolution time by 35%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise SaaS Data Platform

- Developed high-performance **Python** backend services on **AWS EC2** and **RDS** to support data processing for enterprise SaaS applications, handling 10M daily transactions efficiently.
- Integrated **OpenAI API** into a client-facing data analytics platform to provide intelligent insights, enhancing user engagement and data interpretation capabilities by 20%.
- Designed and built **ETL pipelines** using **Apache Airflow** and **S3** for **structured data** and **unstructured data**, improving data ingestion speed by 40% for reporting.
- Implemented scalable **microservices** architecture using **Spring Boot** and **Docker** for a core platform module, improving system reliability and reducing latency by 15%.
- Contributed to the development of **REST APIs** using **Node.js** and **Express.js** for integration with various monitoring systems, supporting 500+ daily API calls effectively.
- Automated infrastructure provisioning using **Terraform** on **AWS** for new service deployments, reducing setup time from days to just 3 hours for development teams.
- Developed real-time **event-driven architectures** components using **Apache Kafka** for streaming data, supporting instant alerts and analytics across 3 critical enterprise systems.
- Collaborated on **CI/CD pipeline** enhancements with **Jenkins** and **Kubernetes** for automated testing and deployment, decreasing critical bug introduction by 10%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | B2B E-commerce Solutions

- Developed robust **Java** backend services for a high-traffic B2B e-commerce platform using **Spring Boot**, handling 500K daily user interactions with 99.9% uptime.
- Implemented **REST APIs** for third-party integrations and internal services, facilitating seamless data exchange and expanding platform capabilities for over 20 partners.
- Designed and managed **MySQL** databases, optimizing schemas and queries to improve data retrieval performance for critical business reports by 30%.
- Contributed to deployment automation scripts using **Bash** and **Ansible** on **AWS EC2** instances, reducing manual deployment efforts by 60%.
- Collaborated on building secure user authentication and authorization modules using **JWT** for sensitive data, ensuring compliance and protecting over 100K user accounts.
- Developed features for order processing and inventory management systems, utilizing **RabbitMQ** for asynchronous communication and improving system throughput by 15%.

Skills

Languages: Python, Typescript, Node.js, Java, Bash, C#, .NET, RUST
Frameworks & Tools: React, Kubernetes, Docker, Spring Boot, Express.js, Apache Airflow, Apache Kafka, Terraform, Ansible, Jenkins, GitHub Actions, JWT, RabbitMQ, Grafana, Prometheus
Cloud & Infra: AWS, Azure, GCP, S3, AWS Lambda, AWS EC2, AWS RDS, AWS Aurora, PostgreSQL, MySQL
Concepts: Microservices, REST APIs, CI/CD Pipelines, ETL Pipelines, Event-Driven Architectures, Scalable Systems
AI Tools: LLM Frameworks, OpenAI API, TensorFlow, LangGraph, Prompt Engineering, PII Redaction

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
