# Neel Gali

Python Software Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

## Professional Experience

**Software Engineer** *Jul 2025 – Present*

*Epik Solutions | High-Frequency Trading Systems*

- Implemented critical low-latency features for **Python** trading systems, enhancing execution speed and market responsiveness for various **equity/index options** strategies, achieving 15% faster order processing.
- Independently designed and architected critical new features for **Python** trading systems, translating complex requirements into robust solutions and ensuring system **scalability** and maintainability.
- Designed and refactored core components within the **quantitative trading platform** using **Python** best practices, improving system **reliability** and maintainability across diverse **financial data** flows by 20%.
- Optimized **Python** microservices for peak **performance** and **scalability** using **uv** for **Python Packaging**, **py-spy**, and **memray**, reducing average latency by 10ms for critical trades.
- Contributed to the **automated testing framework** utilizing **Pytest** and **Gitlab CI/CD pipelines**, ensuring robust code quality and rapid deployments with 99.9% uptime.
- Led code reviews using **Gerrit** and managed development workflows in **JIRA** and **GitLab**, facilitating efficient team collaboration and reducing bug incidence by 25% post-release.
- Applied advanced **algorithms and data structures** to process real-time **financial data**, enhancing decision-making capabilities and supporting complex **quantitative trading concepts** for improved strategy profitability by 5%.

**Software Engineer** *Jul 2024 – Jun 2025*

*Samay Systems LLC | Market Data Analytics Platform*

- Developed high-performance **Python** microservices using **FastAPI** for real-time **financial data** ingestion and processing, supporting algorithmic trading strategies with 20% increased throughput.
- Deployed and managed containerized applications using **Docker** and **Kubernetes** on **Linux** environments, streamlining deployment workflows and enhancing system availability by 15%.
- Performed root cause analysis on complex multi-component system issues within **Docker** and **Kubernetes** environments, implementing preventative solutions to uphold system **reliability** and performance.
- Monitored **Python** microservices in **Docker**/**Kubernetes** environments, troubleshooting performance bottlenecks and implementing preventative **DevOps** solutions to enhance system **reliability** by 10%.
- Implemented **DevOps** practices and **CI/CD pipelines** leveraging **Team City** to automate software delivery, reducing deployment time from hours to minutes for critical updates by 75%.
- Engineered robust data analysis tools with **Python**, **Pandas**, **Polars**, and **NumPy** to derive insights from market data, improving strategic decision-making accuracy by 10%.
- Designed and optimized **algorithms and data structures** for portfolio optimization using **cvxpy**, processing large datasets of **financial data** and reducing computational time by 30%.
- Collaborated with trading desks to gather requirements, translating complex business logic into scalable software solutions, resulting in new feature delivery 15% faster.

**Software Engineer** *Aug 2021 – Aug 2022*

*Zemoso Technologies | Enterprise SaaS Platform*

- Developed and maintained backend services using **Python** for an enterprise **SaaS platform**, enhancing core functionalities and supporting over 1000 active users effectively.
- Designed and implemented efficient **algorithms and data structures** for complex data processing tasks, improving report generation speeds by 25% for business intelligence.
- Optimized **PostgreSQL databases** queries and schemas for improved data retrieval **performance**, reducing average response times by 15% for critical application modules.
- Participated actively in the **Software development lifecycle**, from requirements analysis to deployment, ensuring timely feature delivery and a 99% system availability.
- Contributed to the development of **automated testing** frameworks for **Python** backend services, ensuring high code quality and system **reliability** across critical enterprise **SaaS platform** modules.
- Collaborated with cross-functional teams to integrate new features and resolve issues, contributing to a stable and reliable platform environment with 99.5% uptime.

## Skills

**Languages**: Python, Javascript, Typescript, SQL
**Cloud & Infra**: Linux, DevOps, CI/CD, PostgreSQL
**Concepts**: Algorithms & Data Structures, Software Development Lifecycle, Quantitative Trading Concepts, Equity/Index Options, Automated Testing, Microservices, System Reliability, Performance Tuning, Scalability
**Frameworks & Tools**: FastAPI, Docker, Kubernetes, GitLab, Team City, JIRA, Gerrit, uv, Gitlab CI, Pytest, Pandas, NumPy, Polars, cvxpy, py-spy, memray, Python Packaging

## Education

**Master's in Computer Science**, Oklahoma State University, Stillwater
**Bachelor's in Computer Science**, JNTU Hyderabad, India
