Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Nagarro | Interactive Ad Solutions Platform

- Architected and led development of **Golang microservices** for **ad monetization** and **ad measurement**, processing 50M daily ad impressions, boosting revenue by 15%.
- Designed and implemented **Kafka**-based **event-driven systems** for real-time **analytics features**, reducing data latency for client **reporting** to under 5 seconds.
- Spearheaded **frontend development** using **React** and **JavaScript** for interactive ad components, achieving 30% higher user engagement across devices.
- Established **engineering best practices** and **test-driven development** for **Full Stack** teams, improving code quality and reducing production bugs by 20%.
- Implemented **scaling patterns** and **performance optimization** for critical **Golang** backend services, handling peak loads of 100K concurrent users effectively.
- Collaborated on **software architecture** for **low memory footprints** in client-side **JavaScript** ad frameworks, decreasing page load times by 250ms.
- Integrated **webpack** and **npm** into **CI/CD** pipelines, streamlining **frontend development** workflows and accelerating deployment cycles by 30%.

Software Engineer *Jul 2022 – Jun 2025*

Persistent Systems | Enterprise Ad Data Platform

- Developed **Golang** backend services for **ad monetization** data ingestion, processing 20M daily ad events with 99.9% data accuracy.
- Built **React** and **JavaScript frontend development** for **customer-facing insights** dashboards, enhancing user data exploration by 40%.
- Implemented **Kafka** consumers and producers for **event-driven systems** handling ad campaign data, ensuring real-time **reporting** updates within 2 seconds.
- Contributed to **microservices architecture** for **analytics features**, enabling scalable data **aggregations** across diverse ad data sources, improving query speeds by 3x.
- Optimized **application performance** of **JavaScript frontend** components, reducing rendering times by 200ms and improving user experience scores by 15%.
- Implemented **RabbitMQ** for asynchronous task processing in **backend development**, reducing latency for complex **reporting** generation by 60%.
- Performed **performance optimization** on **Golang** APIs, decreasing average response times from 300ms to 80ms, supporting 5,000 requests per second.
- Applied **Agile** methodologies and conducted **test-driven development** for new features, improving sprint delivery predictability by 18% consistently.

Software Engineer *Jul 2020 – Aug 2022*

Brillio | Digital Solutions & Client Platforms

- Developed **Node.js backend development** APIs for client-facing applications, managing 1M daily requests with 99.8% uptime reliability.
- Implemented **React frontend development** for interactive web portals, improving user navigation and reducing support tickets by 10%.
- Ensured **responsive design** and **cross-browser compatibility** across all **JavaScript** applications, expanding user reach by 25% across different devices.
- Utilized **Git** for version control and collaborative **software development**, integrating changes from 5+ team members without conflicts.
- Contributed to **performance optimization** of web applications by optimizing assets via **webpack**, reducing initial load times by 15%.
- Participated in **Agile** sprints, delivering features incrementally and conducting code reviews, improving team velocity by 12%.

Skills

Languages: Golang, JavaScript, Node.js
Frameworks & Tools: React, Kafka, RabbitMQ, Git, webpack, npm, Prometheus, Grafana
Cloud & Infra: CI/CD, AWS, Docker, Kubernetes
Concepts: microservices architecture, event-driven systems, ad monetization, ad measurement, software architecture, engineering best practices, test-driven development, Full Stack, analytics features, reporting, scaling patterns, performance optimization, application performance, low memory footprints, responsive design,

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
