Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI-Powered Streaming Content Platform

- Led development of innovative **AI initiatives** for dynamic screensavers and featured experiences using **Python**, **LangChain**, and **LLMs**, enhancing user engagement by 15%.
- Architected scalable microservices using **AWS Lambda** and **Kubernetes** for content generation and delivery, reducing operational costs by 20% for millions of users.
- Designed and implemented new **BrightScript** features for interactive trivia and dynamic wallpapers on **Roku** platforms, achieving a 25% increase in daily active users.
- Collaborated with **UI/UX design** and product teams to integrate **React Native** frontends with **Python AI/ML** backend services, improving feature rollout speed by 30%.
- Developed and optimized **API design** for external content publishers using **TypeScript** and **Next.js**, streamlining content management workflows for over 50 partners.
- Managed the full lifecycle of **PoC** development to **productionizing solutions** for user-enhancing experiments, delivering critical features ahead of schedule by 10%.
- Implemented robust **CI/CD** pipelines for automated testing and deployment of **AI-powered** content modules on **AWS EC2**, reducing deployment time by 40%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise Media Integration & SaaS

- Developed and maintained core features for an enterprise SaaS platform using **Python** and **TypeScript**, supporting over 100,000 concurrent users with 99.9% uptime.
- Engineered scalable **API design** and **cloud backend integration** with **AWS S3** and **AWS SQS** for media content ingest, processing 5TB of data monthly efficiently.
- Implemented **UI development** for customer-focused dashboards using **React Native** and **JavaScript**, improving user experience and data visualization by 20%.
- Collaborated on designing robust **Microservices** architecture for content management systems using **Docker** and **Kubernetes**, enhancing system resilience by 35%.
- Optimized **PostgreSQL** database queries and schema for improved performance, reducing average API response times by 15% across critical platform features.
- Integrated third-party **OpenAI API** services to power internal knowledge base tools, increasing developer productivity by 25% through advanced content analysis.
- Wrote comprehensive unit and integration tests for new features using **Jira** for tracking, ensuring high code quality and reducing post-release bugs by 40%.
- Participated in **productionizing solutions** for critical streaming data pipelines, ensuring data integrity and availability for business intelligence reporting with 98% accuracy.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Cross-Platform Application Development

- Developed cross-platform mobile applications for consumer electronics using **JavaScript** and **React Native**, reaching over 50,000 active users with smooth performance.
- Implemented **UI development** components and features, ensuring seamless integration with backend **REST APIs** to deliver intuitive user experiences across devices.
- Contributed to embedded software development using **C++** for device firmware, optimizing resource utilization and improving system boot times by 10%.
- Applied **Core OS concepts** like **memory management** and **multi-threading** to enhance application stability and responsiveness, reducing crash rates by 18%.
- Investigated and resolved critical software bugs and performance bottlenecks using debugging tools, improving application reliability by 25% for end-users.
- Managed code versioning and collaboration using **Git**, adhering to best practices for code reviews and continuous integration for a team of 8 engineers.

Skills

Languages: Python, JavaScript, TypeScript, C++, BrightScript
Frameworks & Tools: React Native, LangChain, Docker, Jira, Git, OpenAI API, Next.js, LLMs, AI/ML
Cloud & Infra: AWS S3, AWS Lambda, AWS EC2, AWS SQS, Kubernetes, CI/CD, PostgreSQL, MongoDB
Concepts: API Design, UI Development, Content Management, Microservices, System Design, Embedded Systems, Productionizing Solutions, Multi-threading, Memory Management

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
