# Neel Gali

Software Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

## Professional Experience

**Senior Software Engineer** *Jul 2025 – Present*

*Epik Solutions | Developer Productivity & Core Infrastructure*

- Designed and implemented core application libraries using **Go** and **TypeScript**, enhancing developer velocity for 100+ engineers by improving code reusability 35%.
- Optimized **Bazel** build system configuration for a large **monorepo**, reducing build times by 40% across various service architectures and language toolchains.
- Architected and deployed **CI/CD** pipelines with **Buildkite** and **Kubernetes** on **AWS**, increasing release frequency by 50% while maintaining critical service reliability.
- Developed shared **gRPC** middleware and **Fx (Golang)** patterns to establish best practices for inter-service communication, decreasing integration complexity by 25%.
- Led initiatives to improve **code quality** and **testability** across engineering teams, implementing static analysis tools that reduced critical bugs by 30%.
- Mentored junior engineers on **Linux** operating system internals and modern **service architecture** patterns, improving team's overall technical proficiency by 20%.
- Automated infrastructure provisioning using **Terraform** for **on-premise** clusters and **AWS**, streamlining environment setup for new projects by 60%.

**Software Engineer** *Jul 2022 – Jun 2025*

*Samay Systems LLC | Enterprise Platform Development*

- Built scalable backend services using **Python** and **C++** for a critical enterprise SaaS platform, processing over 100,000 requests per minute efficiently.
- Developed and maintained robust **APIs** using **Python** and **SQLAlchemy** for data access layers, ensuring data integrity and boosting query performance by 20%.
- Implemented containerization strategies with **Docker** for microservices, reducing deployment time by 30% and standardizing development environments for consistency.
- Configured and managed cloud infrastructure on **GCP** and **AWS** using infrastructure-as-code principles, achieving 99.9% uptime for core applications.
- Designed and integrated new features into existing systems, collaborating cross-functionally to meet evolving business needs, leading to a 15% increase in user engagement.
- Optimized application performance by refactoring critical code paths in **Python** and **C++**, decreasing latency for key user interactions by 25%.
- Contributed to **CI/CD** pipeline improvements using custom scripts and **Ansible**, accelerating code deployment cycles by 40% for various project releases.
- Architected resilient, fault-tolerant **distributed systems** for high availability, ensuring seamless data flow and consistent performance across multiple critical enterprise applications.

**Software Engineer** *Jul 2020 – Aug 2022*

*Zemoso Technologies | Web Application Backend Development*

- Developed and maintained **RESTful APIs** using **Python** for web applications, handling user authentication and data processing for 50,000 daily users.
- Implemented database schemas and optimized queries for **PostgreSQL** to enhance data retrieval speed by 30% for key application functionalities.
- Collaborated on feature development, translating product requirements into technical specifications and delivering solutions that improved user satisfaction by 15%.
- Wrote comprehensive unit and integration tests for backend services, improving **code reliability** and reducing production bugs by 20% over two years.
- Configured and managed application deployments on **Linux** servers, ensuring system stability and achieving an average uptime of 99.5% for services.
- Enhanced deployment processes by scripting **automation** for **Linux** servers, reducing manual intervention and accelerating feature delivery cycles for various web applications efficiently.

## Skills

**Languages**: Go, C++, Python, TypeScript
**Frameworks & Tools**: Bazel, Buildkite, Docker, Kubernetes, Terraform, Ansible, gRPC, Fx, SQLAlchemy, Linux
**Cloud & Infra**: AWS, GCP, On-Premise
**Databases & Search**: PostgreSQL
**Concepts**: Service Architecture, CI/CD, Build Systems, Code Quality, Testability, Release Processes, Monorepo, Developer Velocity, REST APIs, Distributed Systems, Automation

## Education

**Master's in Computer Science**, Oklahoma State University, Stillwater
**Bachelor's in Computer Science**, JNTU Hyderabad, India
