Neel Gali

AI Strategy & Solutions Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Stillwater, OK

PROFESSIONAL SUMMARY

AI Strategy & Solutions Engineer with 3+ years of experience in the AI lifecycle, specializing in building and deploying AI agents and advanced automation strategies for enterprise-level customers. Proven ability to translate business objectives into robust AI deliverables, ensuring AI visibility and governance while providing consultative guidance on AI security and compliance best practices.

TECHNICAL SKILLS

AI & Agentic Systems: AI Agents, Large Language Model (LLM) Integration, Prompt Engineering, AI Agent Orchestration Tools, AI Frameworks (LangChain, LlamaIndex, Hugging Face), AI Visibility and Governance Solutions, Responsible Enterprise AI Practices, AI Security and Compliance Best Practices, RAG, Vector Search

Programming & Scripting: Python, JavaScript (ES6+), SQL, Bash, PowerShell, DOM Manipulation, Event Handling, Asynchronous Programming

Cloud & DevOps: AWS, Azure, GCP (Cloud Functions), Docker, Kubernetes, Terraform, CI/CD (Jenkins, GitHub Actions, Azure DevOps), Apache Kafka

Data Management & Analytics: SQL (MySQL, PostgreSQL), NoSQL (MongoDB, DynamoDB), Exploratory Data Analysis, Feature Engineering, Statistical Modeling

Customer Engagement & Automation: Customer Collaboration, Technical Enablement, RPA Platforms (UiPath, Blue Prism), API Integration, Web Scraping, Strong Communication and Presentation Skills

PROFESSIONAL EXPERIENCE

AI / ML Engineer | Epik Solutions

Jun 2025 - Present

• Collaborated with customers and cross-functional teams to gather AI strategy requirements, clarify objectives, and define success metrics, resulting in AI solution roadmaps that align priorities with Island's AI Platform capabilities.

• Configured and deployed AI visibility and governance capabilities for enterprise clients, providing transparency into AI usage, enforcing compliance standards, and promoting responsible enterprise AI practices across complex operational environments.

• Provided consultative guidance on AI security and governance best practices to customer stakeholders, ensuring robust compliance with organizational and regulatory standards for secure AI adoption.

• Troubleshot, maintained, and enhanced existing AI deliverables by analyzing application behavior (DOM structure, APIs, events, network calls) to optimize performance and reliability, reducing incident resolution time by 30%.

• Created comprehensive documentation and delivered technical enablement sessions to train customers on Island’s AI platform, increasing user proficiency and platform adoption by 25%.

• Engaged with customer stakeholders across technical and business teams to ensure successful deployment and adoption of AI solutions, translating complex technical concepts into clear business value.

AI / ML Engineer | Samay Systems LLC

July 2024 - Jun 2025

• Built, configured, and deployed advanced AI agents engineered to interact with web applications, APIs, MCPs, and various data sources to automate complex compliance and risk analysis workflows, improving process efficiency by 40%.

• Analyzed detailed application behavior including DOM structure, APIs, events, and network calls to design, optimize, and adapt automation strategies for robust agentic AI bot development within enterprise environments.

• Tested and validated AI deliverables extensively to ensure quality, reliability, and precise alignment to customer objectives prior to deployment, achieving a 99.5% accuracy rate for automated data collection.

• Applied expertise across the AI lifecycle from ideation and model development to deployment and monitoring for large language model integration, delivering end-to-end AI solutions to meet strategic compliance needs.

• Utilized AI frameworks, prompt engineering, and AI agent orchestration tools to develop secure, governed, and connected AI use cases that leveraged the role and value of MCPs for data access and integrity.

• Developed JavaScript (ES6+) based Web scraping and API integration solutions to collect and validate evidence data from multiple platforms, enabling multi-tenant compliance validation at scale for enterprise level customers.

ML Intern | Monarch Tractor

Jun 2023 - Aug 2023

• Built Python-based scripting experience into preprocessing pipelines to transform raw sensor and image data into training-ready datasets, supporting model development for detection and prediction tasks in autonomous vehicles.

• Developed object detection and segmentation models using PyTorch, TensorFlow, and OpenCV, contributing to the AI lifecycle by providing critical perception capabilities for autonomous and transport-related systems.

• Performed rigorous testing and validation of ML models using CLI-driven workflows, ensuring quality and reliability of outputs against operational constraints for AI deliverables in real-world environments.

• Collaborated closely with engineers and stakeholders to refine AI strategy requirements and validate model outputs against field expectations, demonstrating strong analytical and problem-solving abilities for future AI solution deployments.

Associate Data Scientist | ZeMoSo Technologies

Jul 2021 - Aug 2022

• Contributed to a cloud-based scientific operations platform by building backend services and ML-adjacent pipelines that validated, enriched, and structured experimental data, enabling reliable downstream modeling and decision-making.

• Supported Proof-of-Concept ML experimentation workflows by automating dataset preparation and feature generation, developing scripting experience in Python to streamline data processes by 25%.

• Implemented CI/CD pipelines to validate models, enforce quality checks, and promote artifacts, maintaining auditability and security controls aligned with governance standards for data integrity.

• Utilized strong analytical and problem-solving abilities to identify and resolve data discrepancies, improving data quality by 30% and providing a robust foundation for future AI deliverables and AI strategy initiatives.

EDUCATION

Master’s in Computer Science | Oklahoma State University, Stillwater, OK

Bachelor’s in Computer Science | JNTU Hyderabad, India
