Neel Gali

Software Engineer, Cloud Automation

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Multi-Cloud Automation Platform

- Architected and deployed a multi-**cloud automation** framework on **AWS**, **GCP**, and **Azure** using **Python** and **Terraform** for efficient infrastructure provisioning, reducing deployment time by 40%.
- Led the design and implementation of advanced **CI/CD** pipelines using **Jenkins** and **Kubernetes** for containerized microservices, significantly improving deployment frequency by 70% for new features.
- Developed robust **Service-based architectures** utilizing **Docker Containers** for scalable applications, optimizing **resource management** and reducing operational costs by 25% annually.
- Mentored junior engineers on best **engineering principles**, **Object Oriented Programming** practices, and effective **Software Configuration Management** using **Git**, enhancing team productivity by 15%.
- Implemented comprehensive **testing** strategies and automated **QA** workflows for critical cloud services, ensuring high quality and stability for 10+ production systems.
- Authored detailed technical **documentation** for cloud infrastructure, **CI/CD** processes, and service APIs, facilitating cross-functional team collaboration and reducing onboarding time by 30%.
- Implemented automated security policies and compliance checks across **AWS**, **GCP**, and **Azure** environments using **Terraform**, ensuring adherence to industry standards and mitigating potential risks effectively.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Cloud Infrastructure & DevOps

- Engineered effective **cloud automation** scripts in **Python** and **Perl** for managing virtual machines and network configurations on **AWS** and **Azure**, streamlining operations by 35%.
- Implemented and maintained **CI/CD** pipelines using **GitLab CI** and **Ansible** for automated builds and deployments of critical **development** environments, reducing manual effort by 50%.
- Managed **Linux** servers and administered infrastructure as code using **Terraform**, ensuring consistent configurations and compliance across 20+ production and staging environments effectively.
- Developed and integrated **REST APIs** for secure inter-service communication within a **service-based architecture**, facilitating data exchange and improving system responsiveness by 20%.
- Utilized **Docker** to containerize existing applications, enhancing portability and simplifying deployment processes across various environments, resulting in a 10% efficiency gain.
- Performed rigorous **testing** and debugging of automation scripts and system components, applying solid **Object Oriented Programming** principles to improve code quality by 25%.
- Contributed to robust **Software Configuration Management** by maintaining version control with **Git** and ensuring proper branching strategies for 5+ major project releases.
- Designed and implemented robust monitoring solutions for cloud resources, utilizing **Python** scripts and **AWS** CloudWatch, optimizing **resource management** and enhancing system reliability by 15%.

Associate Software Engineer *Jul 2021 – Aug 2022*

Zemoso Technologies | Enterprise Software Development

- Developed robust backend services using **Java** and **Python**, applying **Object Oriented Programming** principles for maintainable code, effectively serving 500+ daily active users.
- Managed **Software Configuration Management** for several projects using **Git**, ensuring proper version control and facilitating collaborative **development** for a team of 10 engineers.
- Wrote comprehensive unit and integration **testing** suites for new features and bug fixes, reducing critical production defects by 15% across various applications efficiently.
- Performed routine **Linux administration** tasks, including scripting with **Shell Scripting** for system monitoring and log analysis, improving system uptime by 5% reliably.
- Created detailed technical **documentation** for API endpoints and software modules, enabling smoother onboarding for new developers and reducing clarification requests by 20%.
- Collaborated with cross-functional teams to diagnose and resolve complex production issues, applying analytical problem-solving techniques to improve system stability and user experience for critical applications.

Skills

Frameworks & Tools: Docker, Kubernetes, Terraform, Jenkins, GitLab CI, Ansible, Git, REST APIs
Concepts: Object Oriented Programming, CI/CD, Service-based architectures, Software Configuration Management, Resource management, Testing, Documentation, Engineering principles
Languages: Python, Perl, Java, Shell Scripting
Cloud & Infra: AWS, GCP, Azure, Linux

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
