Neel Gali

neellohit69@gmail.com

Skills

Languages: Python, Ruby, Java, JavaScript, SQL, C#
Frameworks: React, Ruby on Rails, SpringBoot, Node, Angular, .NET, ASP.NET Core, GraphQL
Cloud: AWS, GCP, Azure
Tools: Docker, Kubernetes, Jenkins, Git, Jira
Methodologies and Practices: Agile, SDLC, MVC, REST, Maven, TDD, UML

Experience

Full Stack Developer, Oklahoma State University – Stillwater, OK Aug 2022 – May 2024

- Enhanced UI responsiveness, decreasing initial page load times by 30% by implementing lazy loading techniques for image-heavy content
- Optimized database queries, improving data retrieval speeds by 15% by adding indexes to frequently queried fields, and refining pagination logic
- Reduced performance bottlenecks by 20% by refactoring APIs into fewer efficient endpoints
- Resolved deployment-related issues promptly, by using logging and monitoring tools to detect and address potential issues

Software Developer Intern, Monarch Tractor – Livermore, CA Jun 2023 – Aug 2023

- Designed an employee lifecycle management workflow that reduces manual workload by 50% through automation and scripting as an independent intern
- Empowered a cost-effective solution, saving atleast 30% of the budget through contributions during requirement analysis and technical feasibility assessments of vendor proposals
- Streamlined data exchange across APIs for user management, device provisioning, user group administration, licensing, cron job execution using Python scripts and serverless AWS services
- Implemented an end-to-end solution that increased workflow efficiency by 60%, operating autonomously and responding to real-time changes periodically with minimal maintenance overhead

Full Stack Developer, ZeMoSo Technologies – Hyderabad, India Aug 2021 – Aug 2022

- Created UI components, refactored microservices, and built test cases for a scientific experiment tracking platform in a service-based startup, working with cross functional teams in React and Ruby on Rails
- Improved user interface elements, driving a 10% improvement in design consistency by integrating a new UI component into the custom library and replacing subsequent legacy implementations
- Developed and integrated new features for user roles and permissions management
- Resolved issues with non-persisting data in edit forms, reducing error reports by 5% by ensuring backend updates, maintaining UI consistency, and adding tests
- Conducted regular stand-ups and code reviews for a cohort of interns as a part of organizational responsibilities

Projects

Virtual Incubation Centre VIC Github

- Developed a platform for entrepreneurs, mentors, and investors, enabling project registration, mentorship requests, and investment opportunities using Spring Boot, Spring MVC, and Spring Data JPA
- Built personalized user dashboards for managing project progress, mentorship feedback, and investment interactions for seamless user experience and efficient admin managements

Rails Alpha Blog Blog Github

- Created a blogging platform allowing users to create, edit, and manage blog posts, utilizing Ruby on Rails and following MVC architecture
- Implemented user authentication, a robust routing system to handle various URL mappings and actions and active record for database management

Education

Oklahoma State University – MS in Computer Science May 2024
Jawaharlal Nehru Technological University Hyderabad – BS in Computer Science Jul 2021
