Neel Gali

Software Engineer – JVM & Financial Systems
neelgali7@gmail.com | +1 (475) 291-1455 | United States

Summary

Software Engineer with 2+ years of post-graduation experience building **Java and Kotlin-based backend systems** in fast-paced, iterative environments. Strong foundation in **JVM development, CI/CD, and production-first engineering**, with hands-on experience delivering systems that handle financial workflows, validations, and data integrity. Comfortable owning projects end-to-end, collaborating across teams, and shipping software that solves real-world problems.

Technical Skills

Languages: Java, Kotlin, Python
Backend & APIs: JVM services, REST APIs, service-oriented architecture
Financial Systems: transaction processing, validation workflows, data integrity
CI/CD: automated builds, testing pipelines, production deployments
Databases: SQL (PostgreSQL, MySQL), schema design
Systems & Reliability: logging, monitoring, debugging, incident response
Development Practices: iterative development, agile delivery, code reviews
Cloud & Infra: AWS, containerized services (working knowledge)

Professional Experience

Epic Solutions
Software Engineer II
June 2025 – Present

- Built and maintained **Java-based backend services** supporting high-value transactional workflows, ensuring correctness, auditability, and production reliability.
- Designed **validation and processing pipelines** to move data through multiple lifecycle stages safely, reducing manual intervention and operational risk.
- Owned features from concept through production by collaborating with project leads, implementing core logic, and supporting releases.
- Applied **iterative development principles**, shipping small, production-ready changes frequently and refining behavior based on real system feedback.
- Strengthened CI/CD pipelines by improving automated tests and deployment checks, increasing confidence in rapid releases.
- Partnered with engineers across teams to align service interfaces and execution order in complex workflows.

Samay Systems LLC
Software Engineer I
July 2024 – June 2025

- Developed **JVM-based services** that processed and validated structured financial and operational data.
- Implemented **business rules and lifecycle state transitions** to ensure data consistency across downstream systems.

- Contributed to **continuous integration and deployment pipelines**, enabling faster iteration and safer releases.
- Worked closely with senior engineers to drive features from initial design through deployment and production support.
- Assisted in diagnosing production issues and implementing long-term fixes to prevent recurrence.

Monarch Tractor
Software Development Engineer Intern
June 2023 – August 2023

- Built backend automation services in Java and Python to replace manual workflows with reliable, repeatable systems.
- Integrated third-party services and internal APIs to support multi-step business processes.
- Designed background jobs with idempotency and retry logic to ensure correctness under failure conditions.
- Gained hands-on experience operating production systems and supporting iterative releases.

ZeMoSo Technologies
Associate Software Engineer
July 2021 – August 2022

- Implemented backend APIs supporting **high-volume application workflows**, emphasizing correctness, performance, and security.
- Built data-driven features requiring careful schema design and transactional guarantees.
- Participated in on-call support and post-incident reviews, strengthening skills in debugging and root-cause analysis.
- Collaborated closely with cross-functional teams to deliver features from development through release.

Projects

Transactional Processing & Validation Service

- Built a JVM-based service to validate and process multi-step business transactions, ensuring consistency and traceability across systems.

CI/CD Pipeline Modernization

- Improved automated testing and deployment workflows to support faster iteration and safer production releases.

Education

Master of Science in Computer Science
Oklahoma State University

Bachelor of Technology in Computer Science
JNTU Hyderabad
