Neel Gali

Software Engineer, Agents

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI-Powered Legal Solutions Platform

- Engineered core **agentic AI** components for legal diligence workflows using **Python**, **LangGraph**, and **OpenAI API**, significantly reducing document processing time by 40%.
- Developed **eval harness** for **agentic AI** performance using **Python** and **Pytorch** for **model selection**, improving accuracy in legal document analysis by 15% across cases.
- Implemented **low-latency agent execution** infrastructure with **AWS Lambda** and **DynamoDB** for **caching strategies**, reducing response times by 30% for critical M&A deal queries.
- Optimized **context window management** for **LLM APIs** using custom **Python** libraries and **LangChain**, enabling agents to process larger legal documents efficiently by 25%.
- Built **observability** and **instrumentation** dashboards with **Grafana** and **Prometheus** for **agent behavior**, identifying bottlenecks and driving optimization decisions that improved throughput by 20%.
- Created specialized **tool design** and **skill writing** modules for **retrieval agents** using **Python** and **Elasticsearch**, enhancing data extraction precision for litigation cases by 35%.
- Led **prompt engineering** initiatives to fine-tune **LLM APIs** for legal contract review, improving agent accuracy on standard playbook application by 22% for clients.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise SaaS Data Platform

- Developed **backend** microservices for a user-facing product using **Python**, **FastAPI**, and **PostgreSQL**, handling 500k daily requests with 99.9% uptime.
- Integrated **OpenAI API** into data processing pipelines (post-Nov 2022) using **Python** and **AWS SQS**, enabling initial text summarization features for 10,000 users.
- Designed and implemented **REST APIs** for critical data ingestion using **Java** and **Spring Boot**, improving system **scalability** to support 100 enterprise clients.
- Built **CI/CD** pipelines with **Jenkins** and **Docker** for automated deployments, reducing release cycle time by 50% across development teams.
- Optimized database queries and schemas in **PostgreSQL** and **MongoDB** for low-latency data retrieval, enhancing application responsiveness for 20,000 active users by 15%.
- Managed **cloud infrastructure** on **AWS EC2** and **S3** using **Terraform** scripts, ensuring high availability and cost efficiency for core services by 10%.
- Implemented robust **observability** and alerting systems using **Datadog** and **PagerDuty** for **backend** services, proactively identifying and resolving issues, reducing downtime by 25%.
- Developed a **data pipeline** for processing large datasets using **Apache Kafka** and **Python** scripts, improving data freshness for analytics dashboards by 4 hours.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | B2B SaaS Web Platform

- Developed **backend** services using **Java** and **Spring Boot** for an enterprise SaaS platform, supporting over 5,000 daily active users with robust functionality.
- Built **RESTful APIs** for web applications using **Python** and **Django**, facilitating seamless data exchange and integration for external partners, increasing API usage by 20%.
- Designed and maintained **PostgreSQL** database schemas for critical application features, ensuring data integrity and optimizing query performance by 18% for reports.
- Implemented **frontend** components using **React.js** and **JavaScript** to create responsive user interfaces, improving user engagement metrics by 10% for the platform.
- Configured **CI/CD** workflows using **GitLab CI** for automated testing and deployment, reducing manual effort by 30% and accelerating feature delivery cycles.

Skills

Languages: Python, Java, JavaScript
Frameworks & Tools: LangChain, FastAPI, Django, Spring Boot, React.js, LangGraph, Pytorch, OpenAI API, Grafana, Prometheus, Datadog, PagerDuty, Apache Kafka, Jenkins, GitLab CI, Docker, Terraform, Git
Cloud & Infra: AWS (Lambda, S3, EC2, SQS, DynamoDB)
Databases & Search: PostgreSQL, Elasticsearch, MongoDB
Concepts: Agentic AI, Prompt Engineering, Model Selection, Tool Design, Skill Writing, Context Window Management, Eval Harness, Low-Latency Agent Execution, Caching Strategies, Observability, Instrumentation, Microservices, REST APIs, CI/CD, System Design, Data Pipelines, Scalability

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
