Neel Gali

AI Software Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI-Powered Enterprise Solutions

- Led development of an **Agentic AI** platform using **LangGraph** and **Python** on **AWS** for automated financial compliance, accelerating complex business challenges by 40%.
- Designed and implemented **Generative AI** solutions with **OpenAI API** and **Streamlit** dashboards, facilitating **AI-driven solution design** and enhancing marketing campaign efficiency by 35%.
- Developed scalable **GenAI** microservices on **AWS Lambda** using **FastAPI** for real-time data processing, driving business transformation and improving system responsiveness for 10,000 daily users.
- Engineered robust data pipelines using **Python** and **Apache Kafka** to feed **LLMs** for a knowledge management system, achieving an **AI-first mindset** and reducing data ingestion latency by 50%.
- Implemented advanced **prompt engineering** techniques using **LangChain** for custom **AI frameworks** to refine model outputs, boosting accuracy in client applications by 25%.
- Integrated **Workday Core HCM** data with **GenAI** tools using **REST APIs** and **Python** to automate HR report generation, decreasing manual effort by 60%.
- Designed a multi-tenant **AWS** architecture for **GenAI** applications using **Terraform**, supporting 50+ clients and achieving an **AI-first mindset** with reduced provisioning time by 70%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise SaaS Platform Development

- Developed and maintained robust **Python** backend services using **Django** and **REST APIs** for a CRM platform, optimizing performance and supporting 20,000 active users daily.
- Implemented data processing workflows on **AWS S3** and **Lambda** using **SQL** for ETL operations, ensuring data integrity and reducing data latency by 30% for analytics dashboards.
- Integrated third-party APIs like **Stripe** and **Twilio** into the platform using **Node.js**, enhancing core functionalities for payment and communication features, increasing customer engagement by 15%.
- Optimized complex database queries in **PostgreSQL** by 40% through index creation and query refactoring, improving report generation time from 5 minutes to 30 seconds.
- Contributed to **CI/CD** pipeline improvements using **Jenkins** and **Git** for automated testing and deployment, ensuring reliable releases and reducing release cycles from bi-weekly to daily.
- Developed a recommendation engine using **Python** and **Scikit-learn** on **AWS EC2** to personalize user experience, contributing to business transformation and boosting feature adoption by 20%.
- Implemented monitoring and logging solutions using **Prometheus** and **Grafana** for system health, proactively addressing issues and reducing incident detection time by 75% for critical services.
- Refactored legacy codebase into modular **microservices** with **Spring Boot** and **Java** reducing technical debt, enhancing maintainability for future development by 30%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Custom Software Development

- Developed robust backend services using **Java** and **Spring Boot** for a client-facing web application, processing 5,000 transactions per hour reliably, ensuring high system uptime.
- Designed and implemented efficient database schemas in **MySQL** for various project modules, ensuring data integrity and optimizing query performance by 20%.
- Built interactive user interfaces using **React** and **JavaScript** for a B2B portal, enhancing functionality and improving user experience scores by 15%.
- Implemented **RESTful APIs** for secure data exchange between frontend and backend systems, ensuring reliable integration and handling 10,000 daily requests with 99.9% uptime.
- Utilized **Git** for version control and collaborated effectively in an **Agile** environment, ensuring code quality and delivering features on schedule with 90% adherence.
- Performed comprehensive unit and integration testing using **JUnit** and **Mockito** for backend components, significantly reducing post-deployment bugs by 40%.

Skills

Languages: Python, Java, JavaScript, SQL
Frameworks & Tools: FastAPI, Django, Node.js, Spring Boot, React, Docker, Kubernetes, Git, Jenkins, Terraform, Prometheus, Grafana, Confluence, Stripe, Twilio, Scikit-learn, Kafka, LangGraph, OpenAI, Streamlit, LangChain
Cloud & Infra: AWS, AWS Lambda, AWS S3, AWS EC2, PostgreSQL, MySQL
Concepts: Agentic AI, Generative AI, GenAI, AI-driven Solution Design, AI Frameworks, Prompt Engineering, LLMs, Microservices Architecture, Data Pipelines, CI/CD, Agile Methodologies, Scalability, Performance Optimization

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
