Neel Gali
Email: neelgali7 @gmail.com
Ph: 469-288-3885

PROFESSIONAL SUMMARY:

- Skilled IT professional with over 5+ years in Quality Assurance and Software Testing experience of both Web-Based and client server Applications
- Through understanding of software quality activities throughout the software development life cycle (SDLC).
- Detailed understanding of QA methodology (Agile, Waterfall) to ensure quality control.
- Proficient in different phases of Testing like Black Box Testing, White Box Testing, Functionality Testing, Unit Testing, Integration Testing, System Testing, Modular Testing, Backend Testing, Load Testing, Regression Testing and User Acceptance testing.
- Proficient in preparing the test plans, scripts and test cases by analyzing Business Requirements and various other ARTIFACTS with a strong ability to Work closely with Development team and Business Analysts to analyze the test scenarios.
- Good exposure to ETL testing with strong SQL skills.
- Experienced in using **Load Runner** for performance test.
- Good experience with writing and utilizing SQL queries for data verification in Oracle and other RDBMS.
- Extensive knowledge and experience in all stages of the Software Development Life Cycle (SDLC) beginning from initiation and definition to deployment and support.
- Experience in Black box testing with a complete QA cycle from testing, defect logging and verification of fixed bugs.
- Experienced with various domains such as Financial, Health care, Retail and Insurance.
- Ability to Effectively communicate testing activities and findings in oral and written formats with Excellent Analytical skills

TECHNICAL SKILLS:

Programming Languages	Java, SQL, PL/SQL
Application/Web Servers	Apache Tomcat, IBM WebSphere, JBoss, Oracle/BEA WebLogic
IDE	Eclipse, NetBeans, IntelliJ, Spring Tool Suite (STS)
Methodologies	Agile, waterfall, TDD (Test-Driven-Development), Scrum
Testing technologies/tools	Junit, Selenium, Provar, TEST NG, Mockito, Cucumber, JMeter, RFT
Relational Database	Oracle 10g/11g/12C, SQL server 2012/2014/2016, MySQL, DB2
NoSQL Databases	MongoDB, Cassandra, Couch DB
Version Control	CVS, SVN, Rational clear case, Git, Bit bucket
Build Tools	Maven, Gradle, Ant
Platforms	Windows 10, UNIX, Linux

PROFESSIONAL EXPERIENCE:

Monarch Tractor, Livermore, CA **Jun 2023 – Sep 2024**
Software Test Analyst

Responsibilities:

- Led a team of QA engineers in developing and executing comprehensive test plans for new software releases, improving release quality by 25%.
- Spearheaded the implementation of automated testing frameworks using Selenium and Appium, decreasing manual testing efforts by 40%.
- Crafted and maintained detailed documentation of defects and inconsistencies in the software, leading to a 15% reduction in repeat issues.
- Performed daily Night Build & Weekly Build & Release for the product using Ant, Maven build scripts.
- Used MAVEN as a Build Process and used generating Documentation, Reporting, and adding Dependencies.
- Using JUnit test in Eclipse, developed Unit test cases and test suite, curl was also implemented to test.
- Used Jenkins as the integration tool and improved scalability of applications on cross-platforms.
- Prepared and executed Test Cases manually according to the BRD, Technical Specification, Functional Design and Use Case documents, identifying applications functionality, test requirements and coverage.
- Performed regression testing against the various builds of the application.
- Wrote SQL queries and tested front end developed data in the databases.

- Executed automated test scripts using QTP 9.2 to perform through testing
- Defects were tracked, reviewed, analyzed and reported using Quality Centre.
- Prepared test cases for the ETL application according to technical specification document and extensively tested data extraction, transformations and loading processes.
- Validated **ETL** process and reports using **SQL** queries.
- Performed Configuration and compatibility testing, verified the application on different operating systems.
- Interfaced with developers to resolve technical issues and investigated software faults.
- Prepared RTM Document to ensure that all the requirements had sufficient coverage for through testing.
- Analyzed the functional specifications and helped team members to achieve test goal.
- Defects were tracked, reviewed, analyzed and reported using Quality Center.
- Tested the reports developed in the system as per company standards and requirements
- Prepared documentation of the Prescription fulfilment and management module for management review and project presentations.
- Responsible for giving demonstrations and presentation to the management and mentoring other junior team members.
- Deployed the Application EAR and RESTful Services on JBoss Application Server.
- Involved in Production Support and Maintenance of the application and troubleshooting of Issues on JBoss by checking logs, payments etc.

Environment: SQL, HP Quality Center, Windows XP, Quick Test Professional, JSP, Java, MS Excel, MS word, VM ware, Oracle 10g, TOAD, Putty.

ZeMoSo Technologies, India **Aug 2020 – Aug 2022**
QA Test Engineer

Responsibilities:

- Developed build script using MAVEN to build, package, test and deployed the application in WebLogic.
- Use WebLogic fuse for remote console login, JMX management and web server console.
- Used Ant & maven scripts for build and deployment of the application.
- Used Eclipse as IDE tool to develop the application and JIRA for bug and issue tracking.
- Project coordination with other Development teams, System managers and web master and developed good working environment.
- Developed test cases and test plans besides involving in Unit testing, Integration testing and User Acceptance testing extensively.
- Collaborated within and across Agile teams to test, implement, and provide support for technical functions, utilizing a full stack of development tools and technologies.
- Involved in developing detailed **Testing Strategy** for the entire application and developed various test cases.
- Involved in various Automated and Load testing **Scripts** for the Application using **QTP** and **LoadRunner** for Functional and Performance testing.
- Tested application manually and executed automated scripts.
- Extensively worked on **Virtual User Generator**.
- Used **Quality center** for test management and report generation.
- Generated Test Scripts using **LoadRunner** and **QTP** for **Stress testing and Regression testing**.
- **Regression Testing** is performed, and the additional scripts are generated foreach version.
- Worked on **Web Interfaces** functionality and Load testing them.
- Also analyzed the **LoadRunner** reports to calculate **Response time** and Transactions Per Second **(TPS**).
- Implemented Log4J for maintaining application running logs, providing effective troubleshooting feedback.
- Developed test cases and conducted unit tests using the JUnit framework for Java functions and Spring-test for web service testing.
- Utilized Git for version control and Maven for dependency deployment.
- **Environment**: Quick test pro, Quality Center, Load Runner, VB Script, Java, J2EE, WebLogic Server, JSP, EJB, VB, .Net, XML, Oracle, SQL, Ms Office, Unix and WindowsNT/2000/XP, PL/SQL, HP Quality Centre, Load Runner, MS Excel, MS Word, Oracle10G, Putty, Toad.

NCR, India **Jun 2019 - Aug 2020**
QA Analyst

Responsibilities:

- Prepared and executed Test Cases for Sales and Distribution module according to the BRD, Technical Specification, Functional Design and Use Case documents,
- identifying applications functionality, test requirements and coverage.
- Manually Tested the application executing test cases in the Quality center.
- Prepared RTM Document to ensure that all the requirements had sufficient coverage for through testing and identified the requirements and testcases to be automated.
- Created new scripts using QTP to perform through testing.
- Interfaced with developers to resolve technical issues and investigated software faults.
- Analyzed the functional specifications and helped team members to achieve test goal.
- Defects were tracked, reviewed, analyzed and reported using Quality Centre.
- Involved in the automation of the application using QTP.
- Performed Back-End testing using SQL queries extensively within the QTP Script to compare and retrieve data by using Data Base Check points.
- Wrote SQL queries and used them to perform Back End Testing.
- Prepared documentation of the SD module for management review and project presentations.
- Wrote test summery reports and test evaluation reports.
- Contributed greatly to increase the code quality and productivity through Test Driven Development (TDD) and Agile Estimation and Planning.
- analysed System Development Specification (SDS) and Functional Requirements Specifications (FRS).
- Prepared and executed manual test scenarios and test cases based on business and functional
- requirements and Automated identified test cases using Quick Test Professional.
- Created manual test cases from Use cases, Functional specs and other requirement documents.
- Tested formulas for various loan, interest calculations, and currency conversions required for reporting purposes.
- Tested functionality of interest data issued and gained from different customers by the bank from the database for calculating net profit.
- Developed use cases of the application.
- Prepared and executed various test scripts in QTP.
- Participated in meetings and walkthroughs.

RHYM Technologies LLP, India **Jan 2018 - May 2019**
QA Tester

Responsibilities:

- Developed and executed test cases for application testing.
- Manually tested the application.
- Automated scripts using Win Runner.
- Involved in Preparing metrics and sending reports to manager.
- Performed black box, module, integration and system testing.
- Generated defects and tracked errors using Test Director.
- Performed Back-end Testing and data Loading into Oracle tables using SQL LoaderWorked on **Web Interfaces** functionality and Load testing them.
- Also analyzed the **LoadRunner** reports to calculate **Response time** and Transactions Per Second **(TPS**).

Environment: Quick test pro, Quality Center Oracle 9i, UNIX, SQL Loader, VB 6.0, WinRunner6.02, and Test Director Oracle, SQL, Ms Office, Unix and WindowsNT/2000/XP.

EDUCATION:

Master's degree in computer science from Oklahoma State University, Stillwater. **May 2024**
