Neel Gali

Senior Machine Learning Engineer (Search & NLP)

lohitgali@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Machine Learning Engineer (AI/NLP) *Jun 2025 - Present*

Epik Solutions

- Developed and deployed industrial search recommendation engine, boosting result relevance by 25% for enterprise users using NLP algorithms and large model applications.
- Engineered scalable deep learning frameworks with TensorFlow/PyTorch, improving model inference speed by 30% for production-level code, optimizing AI solutions.
- Designed advanced NLP algorithm models for entity recognition, enhancing data extraction accuracy by 20% using machine learning theory and effective strategies.
- Optimized Golang-based microservices for real-time inference, reducing latency by 15% in large model applications, critical for user experience and system reliability.
- Built Python data pipelines for ML model retraining, streamlining data ingestion and ensuring fresh search algorithm models; improving overall system efficiency.

Machine Learning Engineer (AI/Search) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected a multi-tenant search system for 15+ clients, incorporating search algorithm models for enhanced query relevance by 20%, improving user satisfaction.
- Implemented LLM-powered compliance automation using large model applications, summarizing evidence with NLP algorithms, cutting manual auditor effort by 70%.
- Developed distributed data ingestion pipelines in Python on AWS, feeding real-time data for machine learning theory model training and continuous improvement.
- Built full-stack React + GraphQL applications visualizing identity graphs, enabling compliance controls and data management for enterprise users across various teams.
- Designed scalable backend systems using Golang and AWS CDK, ensuring high availability and tenant isolation for 10,000+ users, supporting critical operations.

Machine Learning Engineer Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Developed Python scripts for MLOps data labeling infrastructure, boosting annotation throughput by 20% for critical ML training pipelines and efficiency.
- Implemented serverless data synchronization across systems, improving data consistency for 500+ employees and supporting future ML initiatives effectively.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab platform, ensuring accurate tracking of complex experimental data for 500+ scientists.
- Designed features across 10+ product modules using React, Ruby on Rails, Spring Boot, and PostgreSQL in a microservices architecture for scalability.
- Authored 100+ test cases and resolved critical production issues, enhancing system reliability and data integrity in a regulated scientific platform.

Skills

Programming Languages: Python, Golang, C#, Java, TypeScript, SQL, Bash
Machine Learning & AI: Industrial Search Recommendation, NLP Algorithms, Large Model Applications, Machine Learning Theory, Search Algorithm Models, NLP Algorithm Models, Deep Learning Frameworks, TensorFlow, PyTorch, RAG, LangChain
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Git, CI/CD
Frameworks & Libraries: React, GraphQL, Node.js, ASP .NET Core, Spring Boot, Gin
Databases & Data: PostgreSQL, MySQL, MongoDB, Redis, OpenSearch, Neo4j, Data Pipelines

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
